INTRODUCTION

It is with pleasure that we place this new work, *viz.* Horasara होरासार with English translation, etc., before the learned public, inasmuch as this was a mere name for a long time past just like the works of the celebrated Bhasa (भास). That this is an ancient authoritative work is evidenced by the fact that the learned Mantreswara embodies in his Phaladeepika, Adhyaya XXIV, the effects of the Ashtakavarga found in this work, viz., Horasara, with due acknowledgment. It is a well-known fact among astrologers that Mantreswara was a true follower of the great Varahamihira and Kalyanavarman. From this, it is clear that the author of Phaladeepika held the Horasara in high esteem ; and this fact redounds to the glory of the present work.

The editor of the journal of the Maharaja's Sanskrit College, Mysore, has earned the gratitude of the public by bringing to light for the first time this valuable work on Astrology. This work purports to be written by no less a person than Prithuyasas, son of the celebrated astronomer of Ujjain, *viz.*, Varahamihira; for in the colophon at the end of every Chapter, we read that this work has been written by Prithuyasas, son of Varahamihira. Apart from this, we do not find any statement or assertion anywhere in the body of the text, that this work is composed by Prithuyasas, son of Varahamihira as is found in the very first verse of the षट्पञ्चाशिका—

" प्रणिपत्य रविं मूर्ध्ना वराहमिहिरात्मजेन पृथुयशसा ". But this omission will not stand in the way of deciding the authorship of this work, for there are other evidences to show that this work must have been written by the same Prithuyasas. It is well known that Varahamihira was a great devotee of the Sun-God. His son, likewise was a staunch worshipper of the same Deity, as is evidenced by the benedictory verse of the षट्पञ्चाशिका. In the present work too, the author pays his devout homage to the Sun on the model of Varahamihira See how the benedictory verse of this work—

जयति जगोद्कहेतुर्बिश्वात्मा सर्वलोकदीपकरः ।
अनुदितमुदयविनाशस्थितिकर्त्ता भास्करो दिनाधीशः ॥

is practically a paraphrase of Varahamihira's prayer—

मूर्त्तित्वे परिकल्पितः शशभृतो वर्त्मापुनर्जन्मना-
मात्मेत्यात्मविदां क्रतुश्च यजतां भर्त्ता सरज्योतिषाम् ।
लोकानां प्रलयोद्भवस्थितिविभुश्चानेकधा यः श्रुतौ-
वाचं नः सददात्वनेककिरणस्त्रैलोक्यदीपो रविः ॥

Similarly, the present author says on page 305—

रक्तकुसुमाक्षतगन्धैः संपूज्य दिवाकरं नमस्कृत्य ।
पश्चा स्वशक्तिविभवैर्दैवज्ञं पूजयेद्ग्रहान्थया वा ॥

Another point to be considered in this connection is that the word होरा–Hora, means the famous work Brihat Jataka of Varahamihara. This Horasara is nothing but an easy abridgment of the same work done for the benefit of humanity. This is what he states in the last stanza of this work—

होराशास्त्रसमुद्रं प्रमथ्य धीमन्दराद्रिणा सम्यक् ।
लोकस्यालोककरः शास्त्रशशाङ्कः समुत्क्षिप्तः ॥

This verse is wholly taken by our author from the बृहत्संहिता CVI—1 of Varahamihira. So also the verses XVI—24 to 27 are actual quotations of बृहत्संहिता LXVIII—89 to 92, and so is the XXXII—20, of बृ जा., XXVIII—7. That only a son could use his father's property as his own is an accepted fact, for says the श्रुति "आत्मा वै पुत्रनामासि". So also does our author make full use of Varahamihira's अङ्गविद्या and शाकुनं in the last chapter of this work, in addition to his following closely the path chalked out by Varahamihira. Like the latter, he adverts to ancient authorities like Maya, Yavana, Siddhasena, Prabodha, Mandavya, Vishnugupta (or Chanakya), Jeevasarman and Brahmasaunda. All these lead us to the conclusion that the colophon must have been written by the author himself, who is none other than the illustrious son of the illustrious Varahamihira.

We have already discussed the date of Varahamihira in our Introduction to the Brihat Samhita (See p. v) Prithuyasas should therefore be assigned to the latter half of the 6th Century A. D The object of Prithuyasas in writing this work is to make the abstruse Hora Sastra intelligible to persons of average intelligence. One may put the question here as to why this is necessary, when his father himself has already simplified and abridged it in his लघुजातक. According to the present author, even this लघुजातक was not within easy reach or understanding of ordinary men. That is why he took up the task of writing this work in order to simplify and also to supplement his father's great work.

As stated above, the arrangement of the topics here closely follows that of the बृहज्जातक. This will be clear

from a comparison of the two lists of the names of Chapters. Sometimes our author combines in one and the same Chapter the topics of two Chapters in the Brihat Jataka. For example, the निषेकाध्याय and the जन्माध्याय of the latter are combined here in the निषेकजन्माध्याय. In the case of दशाफल and अन्तर्दशाफल, Prithuyasas waxes eloquent and gives very many useful ideas not seen elsewhere. He treats very elaborately of the दशाफल in nine Chapters VIII to XVI. There is no section in this work corresponding to the द्रेक्काणाध्याय, but in its stead, he gives the अंशशीलाध्याय, where some new principles and subjects are brought to our notice For example, he gives the fatal period for persons born in each अंश—for one born in the Karkataka अंश the 8th, 18th, 21st, 22nd, 72nd and 80th years are dangerous. Just like his father, Prithuyasas too is not in favour of two or more planets combining in a single house. He says it is as bad as the mixture of honey and ghee. Unlike his father, he gives the effects of the conjunction of three and four planets also. Regarding the अन्तर्दशा effect, the learned author states a very important principle in the following Sloka,

अन्तर्दशाधिपक्षेत्रे वर्तते भास्करो यदि ।
तस्मिन् काले दशाप्रोक्तफलं भवति निश्चितम् ॥

in Chapter XXXI नक्षत्रजातकाध्याय (Nakshatrajatakadhyaya) is one of the important and special features of this work, because it treats of the Udu-Dasa system which his father does not treat of. Even the learned Kalyana Varman is not aware of it. Prithuyasas enunciates some important principles in this Chapter. He says that the Udu Dasa system may be calculated wirh reference to either the natal star or the star that is rising in the Ascendant (*vide*

xxx-2). The final stage of all Dasas is bad. The Dasa of an asterism in which a malefic is situated will cause a good deal of trouble to the native at a period which is proportional to the distance travelled by the lord of the Dasa in the star he is in. Similarly, when the twelve houses are divided into three groups of four Rasis each, if there is a weak malefic without benefic aspect in the first group and if the native is passing through the Dasa of that planet in the initial stage of his life then the end of this Dasa will prove fatal to him. Similarly on page 284 (verse No 30), he states a new principle. The birth of a son in the same star as that of the father is dangerous to the mother. Similarly, the identity of stars between the mother and the son is harmful to the father. Chapter XVII treating of the effects of Ashtakavarga is very important and a special feature of this work inasmuch as he declares " सर्वकर्मफलोपेतमष्टवर्गं विदुर्बुधाः (Verse 75). The Ashtakavarga shows the effects of all actions. Without this, it is very difficult to know the good and bad results of men's actions. It is said that Siddhasena (सिद्धसेन) has treated of this subject very elaborately and our author has taken only the essence out of it. According to him, the Ashtavarga Dasa system is the best of all.

Mantreswara, as stated above, has taken only the quintessence of Chapter XVII of this work in his work (Chapter XXIV). He has quoted *verbatim* a few verses of the Horasara and some he has paraphrased in his own words

This work contains 32 chapters. The बृहज्जातक contains 28 (27 + 1), the सारावली 54 (27 × 2) and the फलदीपिका 28 (27 + 1) chapters. What may be the

rationale behind this number ? We know that there are 27 asterisms and if we add अभिजित् (Abhijit) also the number becomes 28. Both Varahamihira and Mantreswara must have had this idea at the back of their mind when they chose this number. In the सारावली this number must have been doubled. Prithuyasas also must have had some special reason for choosing the number 32, which has a mystic significance. The throne that was presented to the great Vikramaditya had 32 dolls supporting it. Similarly the age of 32 in a person's life is a very significant period. It may prove a turning point in his life. One may renounce the world and become a great Yogin, or, one may shuffle off one's mortal coil. That is why द्वात्रिंशद्योग is dangerous in a person's horoscope.

The number 32 is to be computed as 16 × 2. Sixteen is a favourite number attributed to the Moon who is the starting point for astrological infeernces and the very planet who influences the Moon the most, The Moon's कला: are 16 (*Vide* : Amara Kosa 1 Kanda— कला तु षोडशो भागो बिम्बोऽस्त्री मण्डलं त्रिषु ॥ and my edition of Uttara Kalamrita—Chapter IV—Sloka 28. It is quite probable that Prithuyasas wanted to associate the Moon with his work and this argument appears rational.

This work in a way specializes in different kinds of आयुर्दाय and several kinds of Yogas, Rajayogas, etc. Hence this number seems to have been selected by the author with this object in view.

In Chapter VII dealing with आयुर्दाय, there is also some speciality Varahamihira speaks of only four kinds of reduction, *viz* ; नीचार्द्धहरण *i. e.*, reduction by half of the life-period contributed by a planet that is debili-

tated, (2) शत्रुक्षेत्रहरण reduction by a third, (3) अस्तङ्गतहरण reduction by half for the planet that is eclipsed, and (4) दृश्यार्द्धहरण reduction for malefics in the visible half by full ½, etc. ; but Prithuyasas speaks of two more reductions, *viz.*, (1) युद्धहरण — reduction by ⅓ for a planet that is defeated in a fight, and (2) अंशुरश्मिकर्षहरण for the luminaries, by ¼ (or $\frac{1}{12}$?) According to Varahamihira, the number of years contributed by the Lagna corresponds to the number of Navamsas that have risen, while Prithuyasas says "लग्नेश्वरांशकसमानि" etc *i. e.*, the number of years corresponding to the number of the Navamsas reckoned from Mesha occupied by the lord of the Lagna. The present author gives direction as to when the different systems of Ayurdaya are to be resorted to. In Chapter XVIII also, he gives the following valuable information : A person will be married during the sub-period of the planet owning the Navamsa of the lord of the 7th house in the person's birth-chart. The death of a brother may take place when Saturn passes thro' the Rasi indicated by the sum-total of the figures of the lords of the 6th, 8th and 12th houses. One may quit the world during the Dasa of the planet presiding over the Navamsa in which Rahu is posited. Similarly, the month of death is to be found out by multiplying the Sun's figure in minutes by that of Rahu (in minutes) and dividing the product by 21,600 and then by adding this quotient to the Sun's figure, which will indicate some Rasi. There is a Yoga called Bhagya Yoga mentioned among the Raja Yogas, which is brought into existence, when all the planets including the Ascendant are in odd signs and when the Moon is waxing and when the birth is at day-time ; in the case of females, the signs and time

of birth being altered. Similarly he gives some very valuable ideas in the Chapter on 'Lost Horoscopes'.

In view of all the instructive aspects of the work mentioned above, we are sure that the public will welcome it with eagerness. We shall deem our efforts amply rewarded if the learned public feel enriched in their knowledge through the present publication. It is also our earnest prayer that all human beings attain the goal of their existence by doing their tasks on this earthly plane in accordance with the wishes of the lord as indicated by the Planets.

प्रथमोऽध्यायः

जयति जगदेकहेतुर्विश्वात्मा सर्वलोकदीपकरः ।
अनुदिनमुदयविनाशस्थितिकर्ता भास्करो दिनाधीशः ॥१॥

Sloka 1.—There flourishes the (divine) Sun, the lord of the Day, who is the sole cause and the soul of the Universe, whose rays illumine all the worlds and who daily brings about creation, destruction and protection.

निमिषादिवत्सरान्तः कालो राशिप्रमाणमेकैकः ।
गणितस्कन्धे प्रोक्तं पूर्वं ग्रहलक्षणैः सार्धम् ॥२॥

Sloka 2.—Time beginning with a second (time taken for a wink) and ending with a year and the measure of each sign of the zodiac have been already treated of along with the characteristics of planets in the section on astronomical calculations.

Vide the 3 Skandhas referred to in Brihat Samhita.

होरास्कन्धे सम्यग्दशाविभागः पुरा विनिर्दिष्टः ।
विस्तारिशास्त्रमार्गैर्न शक्यते मन्दबुद्धिभिर्ज्ञातुम् ॥३॥

Sloka 3.—The differentiation of the various Dasa periods has already been well explained in the section on Horoscopy. But it cannot be grasped by the dull-witted who require a very elaborate scientific method.

Here the author refers to the stiff nature of Varahamihira's Brihat Jataka.

तस्मात्प्रयोगसिद्धैराचार्यैर्यत्फलं प्रोक्तम् ।
तत्स्पष्टार्थं वक्ष्ये होराशास्त्रार्णवात्सारम् ॥४॥

Sloka 4.—Hence, I shall state the essence of the ocean of the Horary Science in order to clarify the effects that have been declared by the (ancient) teachers whose predictions have proved correct by experience.

मेषवृषमिथुनकर्कटासिंहाः कन्या तुला च वृश्चिककः ।

The signs Mesha, Vrishabha, Simha, Karkata and Vrischika have forms (*lit.* move) in accordance with their names. And sign Mithuna is to be understood to be a human couple (man and woman) holding a staff and a lute respectively.

Slokas 9-10.—The lords of the 3rd, 6th, 7th, 10th and 11th houses from their respective Moolatrikona houses happen to be the enemies of the various planets. This rule does not apply to the lords of their exaltation-Rasis. A learned man should consider the lords of the other Rasis to be the friends of the several planets. Planets are said to be of three kinds: friends, enemies and neutrals among themselves.

For example, the Moolatrikona of the Sun is Simha. So according to the above rule, Venus, Saturn and Mercury become the enemies of the Sun. Mercury is only his neutral as he has only one chance, while the others have two.

However strong a planet may be, still it will not produce any good effect, if it be eclipsed; and during its Dasa, only bad effects will accrue to the native This applies also to the Bhava which the planet occupies ; *i. e.* it will only spoil the Bhava. Similarly, if the planet forms any yoga, even that will be harmed by the said planet.

इति श्री वराहमिहिरसुतश्रीपृथुयशोविरचिते होरासारे बलनिरूपणाध्यायस्तृतीयः ॥

Sloka 37.—Benefic planets being strong (uneclipsed also) usher into the world men that are fortunate (amiable), brilliant (valorous) and handsome If, on the other hand, the malefics are stronger than the benefics, only idiots and sinful persons will be born.

Thus ends the 3rd Adhyaya called the 'Enumeration of Strength'.

चतुर्थोऽध्यायः

अङ्गनाजन्मपीडर्क्षं याते ताराधिपे तथा ।
रक्तेक्षिते युते वा स्यादार्तवं गर्भकारणम् ॥१॥

Sloka 1.– When the Moon in her transit is posited in an Apachaya house in a woman's nativity and is aspected by or conjoined with Mars, menses will set in which will (be the cause of) lead to her pregnancy (conception).

बालवृद्धातुरावन्ध्या मुक्त्वा चान्यासु लक्षणम् ।
त्रयोदशनिशाः स्नानादृतुकालं प्रचक्षते ॥२॥

Sloka 2.—Barring children, old, sickly and barren women, the Ritu Kala (period of conception) in the case of other women is declared to be 13 nights after bathing (on the 4th day).

स्त्रीणामुपचयस्थेन्दौ शुभपुंग्रहवीक्षिते ।
शुभोदये युग्मरात्रौ निषिञ्चेत्पुत्रधारणम् ॥३॥

Sloka 3.—When the Moon occupying an Upachaya house with respect to a woman's nativity is aspected by the male benefic planet, or rises with it, sexual union should take place on a night of even number (or the seed must be sown) for bearing a son.

रवीन्दुशुक्रजीवैर्वा स्वर्क्षे वा स्वांशकोदये ।
भौमदृष्टे युते वाऽपि पुंयोगाः स्युरिमे स्मृताः ॥४

Sloka 4.—The following are the yogas leading to the sexual union to be effective (for the birth of a son):—(1) The Sun, the Moon, Venus and Jupiter being posited in their own houses ; (2) in their own Navamsas ; or (3) in

the Ascendant and being aspected by or conjoined with Mars.

लग्नस्थो वा सुतस्थो वा धर्मस्थो वा बली गुरुः ।
प्रोक्तर्क्षे शुभवारे स्याद्धारयेद्गर्भमुत्तमम् ॥५॥

Sloka 5.—Jupiter strong and posited in the Ascendant, the 5th or the 9th house, or in any of the houses mentioned in the previous verse (or in a good asterism) and on an auspicious week day, leads to the conception of a male child in the womb.

लग्नात्मजेशौ संयुक्तावन्योन्यं वाऽपि वीक्षितौ ।

पुंग्रहाः षष्ठलाभस्थाः पञ्चमेशो बली यदा ।
सर्वे विषमराशिस्थाः पुत्रयोगा इमे स्मृताः ॥८॥

Slokas 6-8.—The following are the yogas that lead to the birth of a son:—(1) The conjunction of the lords of the Lagna and the 5th house; (2) the mutual aspect of these two lords; (3) exchange of places between the lords; (4) Saturn being strong, posited in an odd house except the Lagna and not being aspected by or conjoined with any other planet; (5) all the male planets occupying the 6th or (and) the 11th house; (6) the lord of the 5th house being very strong; and (7) all the planets occupying odd houses. (All these refer to the आधान.)

चन्द्रशुक्रौ युतौ वाऽपि पञ्चमे दशमेऽपि वा ।
स्वर्क्षे वास्वांशके वाऽपि स्त्रीयोगाः शास्त्रलक्षिताः ॥९॥
राहूदये चन्द्रदृष्टे विपरीतेऽथवा यदि ।
चन्द्रहोरागते शुक्रे केन्द्रस्थे वा तथैव च ॥१०॥

Slokas 9-10.—The following are the female producing yogas laid down in the science :— (1) the conjunction of the Moon and Venus either in the 5th house or the 10th house (2) their occupying their own Rasis ; (3) they being in their own Navamsas ; (4) Rahu in the Lagna being aspected by the Moon ; (5) the Moon in the Lagna being aspected by Rahu ; (6) Venus in the lunar Hora and (7) Venus in a Kendra.

द्व्यङ्गस्थिते बुधे लग्ने दृष्टे वा दशमेऽपि वा ।
यमलं कुरुते योगं पुंस्त्रियो राशिसंश्रयात् ॥११॥

Sloka 11.—When Mercury is in the Lagna identical with a dual sign or when such a Lagna is aspected by Mercury, or when Mercury is in the 10th house, twins will be born, the sex of the twins being decided by the Rasis and Amsas occupied by the above.

युग्मर्क्षगौ चन्द्रशुक्रौ द्व्यंशस्थौ वा बुधोदये ।
विषमेष्वारजीवौ वा यमलः स्यान्न संशयः ॥१२॥

Sloka 12.—There will undoubtedly be born twins under the following yogas; (1) the Moon and Venus both posited in even signs, or in dual Navamsas ; (2) Mercury in the Lagna and Mars and Jupiter in odd signs (or Amsas).

[In the above case if Mercury occupies Mithuna or Dhanus and the same Navamsa, or if Mercury aspects the Lagna, both in male dual Rasi or Amsa, there will be two boys, otherwise, girls.]

अन्योन्यमभिवीक्षेते चन्द्रादित्यौ दिवा यदि ।
बुधमन्दौ तथा रात्रौ षण्डयोगद्वयं भवेत् ॥१३॥

Sloka 13.—If the Sun and the Moon aspect each other at day time or (2) if Mercury and Saturn aspect each other at night, eunuchs will be born under these two yogas.

विबीजिनामिमे योगा निष्फलाश्च भवन्ति हि ।
अन्धाश्च नृगुणैर्हीना यथायोगास्तथाविधाः ॥१४॥

Sloka 14.—The above yogas (planetary positions) will be utterly null and void for persons without the seed or virility, just as blind men are devoid of manly qualities. So the blind and these yogas stand on a par with each other.

कललं प्रथमे मासि तस्य मासाधिपो भृगुः ।

मासलक्षणयुक्तश्चेद्गर्भः सुखमवाप्नुयात् ।
ऊनाधिकगुणांस्तस्य ज्ञात्वा प्रसवमादिशेत् ॥२०॥

Slokas 15-20.—In the first month of pregnancy, the foetus will be in the form of only coagulated blood and is presided over by Venus; in the second month, it resembles the seed of Pingaksha and is presided over by Mars; in the third, it is in the form of a sprout and is presided over by Jupiter; in the fourth, it gets marrow and bones and is presided over by the Sun; in the fifth, skin, fat and blood are produced in it, and the lord of the month is the Moon; in the sixth month, all the limbs

arise and the month is presided over by Saturn; in the seventh month, the senses make their appearance and the month is presided over by Mercury; in the eighth month, the child in the womb feels hunger and thirst, and the month is presided over by the lord of the आधान Lagna; in the ninth month the child gets movements or pain and the month is presided over by the Moon; and in the tenth month, delivery of the child will take place, and the lord of the month is the Sun. If the foetus be endowed with the characteristics prescribed for each month, it will develop without any trouble (*i. e.*, if the lords of the months be not be afflicted by malefics and so on). The delivery should be predicted after a careful survey of the strength or otherwise of the presiding planets of the several months.

यस्य मासाधिपो रक्तो भग्नो वाऽस्तंगतोऽपि वा ।
तस्मिन् मासे क्षयं याति प्रसवो न भविष्यति ॥२१॥

Sloka 21.—In the particular month whose lord is afflicted, defeated or eclipsed, the child in the womb will perish and it will not be delivered safe.

गर्भाधाने चरे राशौ दशमे मासि सूयते ।
स्थिरे चैकादशे मासि ह्युभये द्वादशे सवः ॥२२॥

Sloka 22.— If the Lagna at impregnation be a moveable sign (if the Moon at the time be posited in a....), the delivery will take place in the 10th month; if it be a fixed one, delivery will be in the 11th month ; and if in a dual sign, it will be in the 12th month.

देहस्य दक्षिणे भागे स्पर्शनेन पुमान् भवेत् ॥२५॥
अन्यथा स्त्रीप्रसूतिः स्यात् स्त्रीग्रहेण युतेक्षितात् ।

Slokas 23–25½.— The effects declared for the आधान (inpregnation) should be applied to queries as well. If the Arudha Lagna, in respect of a query regarding the sex of a child in a woman's womb, be an odd sign, aspected by and conjoined with male planets, then the child will be a male one. If the querist should touch a man, utter a male syllable, or touch the right side of his body, then the child may be a male one. Otherwise, when the Lagna is aspected by or conjoined with a female planet, a female child should be predicted.

लग्नेन्द्वोर्यो बलवांस्तस्य द्विरसांशकान्वितो राशिः ।

इति श्री वराहमिहिरसुतश्रीपृथुयशोविरचिते होरासारे निषेकजन्माध्यायश्चतुर्थः ॥

Slokas 26-28.—Of the Lagna and the Moon at the time of query find which is stronger. Note the Dwadasamsa of this stronger significator. When the Moon transits through a Rasi which is as many signs removed from the sign indicated by the Dwadsamsa, the birth of the child may be predicted.

Note :— For example, let us assume that the Moon is in Vrishabha in Tula-Dwadasamsa, and that the Moon is stronger

than the Lagna. Then the birth may be predicted when the Moon transits through Meena—which is the 6th from Tula, since Tula Dwadasamsa is the 6th Dwadasamsa in Vrishabha.

The birth may also take place when the Moon is posited in the 7th house from the Rasi owning the Navamsa of the Moon at the time of the query; or it may happen when the Moon is posited in the house of the lord of the rising Navamsa; or it may happen when so much of the day or night is passed as the fraction of the Lagna which is a night or a day sign as the case may be. The child in the womb will be quite all right when the lord of the 4th house (from the Prasna Lagna) is strong, or is conjoined with benefics (or aspected by benefics).

Thus ends the 4th Adhyaya entitled the "Impregnation and Births."

पंचमोऽध्यायः

अथ मातापित्ररिष्टं सूतिकालस्य लक्षणम् ।
प्रवक्ष्यामि समासेन सद्यो मरणमेव च ॥१॥

Sloka 1.—I shall now succinctly treat of the evil effects accruing to the parents of a child and also define the characteristics of the time of its birth and (the causes of) its sudden death.

जातस्य पूर्वषट्कस्था ये ग्रहास्ते शुभप्रदाः ।
ये ग्रहाः परषट्कस्था परोक्षफलदायकाः ॥२॥

Sloka 2.—The planets that are posited in the first six signs in a nativity yield good effects (in the first half of the life), while those in the latter six signs, in the second half.

A better interpretation would be only those planets that are in the first six sjgns yield good results which can be experienced

by the native, while those in the other produce good effects which he cannot enjoy directly. He may enjoy in dreams; he may be spoken highly of in his absence etc.,

भानुः पिता च जन्तूनां चन्द्रो माता तथैव च ।
तयोर्बलाबलं ज्ञात्वा पितृमातृगुणान्वदेत् ॥३॥

Sloka 3.—The Sun and the Moon are the father and the mother respectively of living beings. Hence, one should pronounce the qualities of the parents after ascertaining the strength and weakness of these two luminaries.

पापदृष्टो युतो भानुः पापमध्यगतोऽपि वा ।
पित्रारिष्टं विजानीयाच्छिशोर्जातस्य निश्चयात् ॥४॥

Sloka 4.—If the Sun be aspected by, conjoined with, or hemmed in between malefics, there will certainly arise trouble (evil effects), it must be understood, to the father of the child born.

भानोष्षष्ठाष्टमर्क्षस्थैः पापैः सौम्यविवर्जितैः ।
चतुरश्रगतैर्वाऽपि पित्रारिष्टं समादिशेत् ॥५॥

Sloka 5.—When the 6th and 8th, or the 4th and 8th houses from the Sun are occupied by malefics alone, without the association of benefics, trouble to the father must be declared.

भामांशकस्थिते भानौ स्वपुत्रेण निरीक्षिते ।
प्राक्जन्मनो निवृत्तिः स्यान्मृतिर्वाऽपि शिशोः पितुः ॥६॥

Sloka 6.—When the Sun occupying an Amsa of Mars is aspected by Saturn, the child's elder brother (or sister) will quit the world or the father of the child may die.

भौमे सूर्यांशकयुते सुखभे धर्मभेऽपि वा
नेक्षिते (तो) गुरुशुक्राभ्यां नेक्षते पितरं शिशुः ॥७॥

Sloka 7—If Mars occupying an Amsa belonging to the Sun or Saturn in the 4th or the 9th house be not aspected by Jupiter or Venus, the child will not see the father, *i. e*, the latter will die before its birth.

भौम: सौरांशकगत: is another reading in the first line.

मात्ररिष्टं तु चन्द्रेण ज्ञात्वैवं पूर्ववद्वदेत ।
क्षीणचन्द्रात् त्रिकोणस्थैः पापैः सौम्यविवर्जितैः ॥८॥
मात्ररिष्टं तु चन्द्रेण ज्ञात्वैवं पूर्ववद्वदेत् ।

Slokas 8,8½.—Harm to the mother will have to be predicted as before through the Moon When malefics without any benefic association occupy the 5th and 9th houses reckoned from the waning (weak) Moon, the boy will undoubtedly be bereaved of the mother as before.

एकांशस्थौ तु मन्दारौ यत्र कुत्र स्थितावपि ॥९॥
शशिकेन्द्रगतौ वाऽपि द्विमातृभ्यां स जीवति ।

Sloka 9,9½.—When Saturn and Mars occupying the same Amsa (Navamsa) are posited any where or are in Kendra house or houses with respect to the Moon, the child lives with two mothers (does not live with its lawful mother).

मात्रा सह न जीवति is another reading.

तयोर्बलाबलेनैव पितृमातृगृहोद्भवः ॥१०॥
मूर्तिर्बलान्विता यस्य पितृवेश्मनि संभवः ।

Sloka 9½-10½.—Through the strength or weakness of the two, *viz.*, Saturn and Mars, the birth of the child in the house of the father and the mother respectively should be inferred. If the Lagna be very strong, the birth will be in the father's house.

चरराश्यंशके भानौ चराश्यंशकोदये ॥११॥
शिशोः पितान्यदेशस्थः सूतौ लग्नं न पश्यति ।

Sloka 11,11½.— When both the Sun and the Lagna occupy a moveable sign and a moveable Amsa, the father of the child will be in a foreign place, provided the Sun does not aspect the Lagna.

लग्नं न पश्यति विधौ चरराश्यंशके स्थिते ॥१२॥
परोक्षगः पिता तस्य सूतिकाले न संशयः ।

Sloka 12,12½.— When the Moon occupying a moveable Rasi and Amsa does not aspect the Lagna, the father is undoubtedly in a distant place at the time of birth of the child.

वागीशे नीचसंस्थे च चन्द्रे राश्यंशसन्धिगे ॥१३॥
मूको वाऽपि जडोवाऽपि सौम्यैः पापसमन्वितैः ।

Sloka 13,13½—When Jupiter is posited in his debilitation sign, the Moon is at the junction of two Rasis or two Amsas, and the benefics are conjoined with malefics, the child born will be dumb or imbecile.

भाग्यबन्धुगताः पापाः लग्नेशे बलवर्जिते ॥१४॥
जन्मकाले पिता रोगी कुजदृष्टेऽथवा युते ।

Sloka 14,14½.—When the lord of the Lagna is weak and aspected by or conjoined with Mars, and malefics occupy the 4th and 9th houses, the father is bedridden at the time of the birth.

अर्कांशकस्थिते मन्देऽप्यर्केणैव निरीक्षिते ॥१५॥
सूतिकाले पिता दुःखी शिशो रिःफाष्टमेऽपि वा ।

Sloka 15,15½ —When Saturn occupying a Navamsa of the Sun is also aspected by him or is posited in the 8th or the 12th Bhava, the child's father will be miserable at the time of birth.

न पश्यति गुरौ चन्द्रं लग्नं च परजातकः ॥१६॥
सार्केन्दुनेक्षिते जीवे सूर्येन्दू पापसंयुतौ ।

Sloka 16,16½ —When the Moon or the Lagna is not aspected by Jupiter, the child is born of a paramour. The same effect should be declared if Jupiter is aspected by the Moon in conjunction with the Sun, and if the Sun and the Moon are associated with malefics.

गुरुराश्यंशके चन्द्रे चन्द्रराश्यंशके गुरौ ॥१७॥
परस्परांशराशिस्थौ चन्द्रार्कौ नैव जारजः ।
पूर्वोक्तयोगसंभूतो परैर्जात इतीष्यते ॥१८॥

Slokas 17-18.—When the Moon is posited in a Rasi or Navamsa belonging to Jupiter, or Jupiter is in a Rasi or Navamsa owned by the Moon, or when the Sun and the Moon are posited each in the other's Rasi or Amsa, the child should be positively declared to be legitimate and not born of a paramour, while those born under the yogas mentioned in the previous verse are to be pronounced as illegitimate.

कालस्याङ्गविभागेषु यस्मिन् राशौ शुभाः स्थिताः ।
तत्र लक्ष्मव्रणादीनि चिन्तयेत्तन्निमित्ततः ॥१९॥

Sloka 19—Among the signs which represent the various limbs of Kalapurusha, note which Rasis are occupied by benefics; one should expect in those limbs some marks (moles), scars (ulcers) etc. caused by those planets.

Note. Benefics cause only moles and such other marks, while malefics do ulcers, etc.

सद्यो मरणयोगा हि बहवः शास्त्रदर्शिताः । (लक्षिताः ।)
तेभ्यः सिद्धान्तयोगास्तु वक्ष्यन्तेऽत्र समासतः ॥२०॥

Sloka 20.—Many yogas leading to the sudden death of a child have been enumerated in the Sastras (science). I shall here briefly mention only the most important ones from among them.

पित्रोर्दोषैर्मृताः केचित् केचिद्बालग्रहैर्मृताः ।
अपरे रिष्टयोगेभ्य (योगाद्यै) स्त्रिविधा बालमृत्यवः ॥२१॥

Sloka 21.—Child-mortality is of three kinds : *viz* (1) Some children die on account of the faults of their parents; (2) some die owing to Balagrahas (certain demons) and (3) others die owing to malignant planetary positions.

एवं सूक्ष्मतरं ज्ञात्वा शिशोर्दोषगुणान्वदेत् ।
आद्वादशाब्दं मर्त्यानामायुर्ज्ञातुं न शक्यते ॥२२॥
जपहोमचिकित्साद्यैर्बालं रक्षेद्गुणाधिकैः ।

Slokas 22,22½.—One should begin to predict the merits and demerits of a child only after ascertaining thus the aforementioned things minutely. It is not possible to ascertain the longevity of human beings until they are 12 years of age. Hence children should be protected through Japa (incantations of holy Mantras, worship of the Fire-God, performance of sacrifices, by administering medicines, *etc.*,) all of which are productive of immense good.

न तु जीविनः in another reading for गतजीविनाः ।

राशिसन्धिषु ये जातास्ते बाला गतजीविनाः ॥२३॥
पापदृष्टो युतो वाऽपि निःसंशयमिति स्मृतम् ।

गण्डान्तेषूद्भवो मर्त्यः पितृमातृकुलान्तकः ॥२४॥
यदि जीवेत्सभूपालो गजवाजिसमन्वितः ।

Slokas 23-24½.—Those children that are born at the junction of two signs are either born dead or are shortlived. This is all the more certain, it is said, when the Lagna is aspected by, or is conjoined with malefics. One born in a Gandanta (Adh I Sl. 4 *supra*) Tara will destroy the entire families of his parents. But if he lives at all, he will become a king rich in elephants and horses.

चन्द्रादित्यौ तृतीयस्थौ क्रूरभे क्रूरसंयुतौ ॥२५॥
व्याधिं तस्य विजानीयात् त्रिवर्षं नातिवर्तते ।

Sloka 25,25½.—When the Sun and the Moon are posited in the 3rd house identical with a malefic sign and in conjunction with malefics in a nativity the native, it should be noted, will fall ill and take his exit before he completes three years.

होरायाः कण्टकस्थेन्दौ निधनेशसमन्विते ॥२६॥
निधनस्थः परः कश्चिज्जातमात्रो विनश्यति ।

Sloka 25½-26½.—If the Moon occupy a Kendra house with respect to the Lagna and be conjoined with the lord of the 8th house and if the 8th house be also occupied by a planet, the child will die immediately after birth.

सहितौ चन्द्रजामित्रे यस्याङ्गारकभास्करौ ॥२७॥
राहूदये तथा जात आदशाहान्मृतो भवेत् ।

Sloka 27,27½.—If at a birth, Mars and the Sun be jointly posited in the 7th house from the Moon and Rahu occupy the Lagna, then the child will die within ten days.

चतुरश्रं गताः पापा वामदक्षिणतोऽपि वा ॥२८॥
तदा यो व्याधिमाप्नोति दशरात्रं स जीवति ।

उद्यद्रेक्काणजामित्रे यस्य स्याद्दारुणो ग्रहः ॥२९॥
क्षीणचन्द्रो विलग्नस्थः सद्यो हरति जीवितम् ।

Slokas 29-29½.—When a malefic planet occupies the 7th house from the rising decanate, and the waning Moon is in the Lagna, the child will die immediately.

अपोक्लिमे स्थिताः सर्वे ग्रहा बलविवर्जिताः ॥३०॥
षण्मासं वा द्विमासं वा तस्यायुः समुदाहृतम् ।

Sloka 30-30½.—When all the planets are weak and occupy the Apoklima houses (3rd, 6th, 9th and 12th) reckoned from the Lagna, the child's longevity, it is declared, is only 2 months, or 6 months at the most.

विलग्नाधिपतिर्नीचे निधने वाऽस्तगो भवेत् ॥३१॥
कृच्छ्रेण जीवितं विद्यान्मृतप्रायो भविष्यति ।

वार्कजोऽपि वा is another reading.

Sloka 30½-31½.—If at a birth the lord of the Lagna be in depression, posited in the 8th house or be eclipsed, (or Saturn be in a similar position), the child will drag on a precarious existence and will be almost dead.

केतोरुदयः पूर्वं पश्चादुल्कादिपतननिर्घाताः ।
रौद्रे सति च मुहूर्ते प्राणेभ्यस्त्यज्यते जन्तुः ॥३२॥

Sloka 32.—A being that is born during a cruel Muhurta, when a Ketu is rising and immediately there are the fall of meteors, portentous thunder and the like, it will lose its life immediately.

तीव्रफ (ब) ल राजयोगा यवनाद्यैर्ये विनिर्मितास्तेषु ।
जायन्ते खलु कुलजारिष्टं तेषु प्रसूतानाम् ॥३३॥

Sloka 33.—Those that are born in the Rajayogas enumerated by the Yavanas and others, and whose effects

are very harmful (cruel), will bring harm to the members of their family.

ग्रहणपरिवेषकाले जातः पापग्रहे विलग्नस्थे ।
पापेन दृश्यमाने जीवति पक्षत्रयं त्रिमासे वा ॥३४॥

लग्नेशे बलहीने is another reading.

Sloka 34.—One born during an eclipse or when there is a misty circle around the Sun or the Moon, when a malefic is posited in the Lagna or when a malefic aspects it (or when the lord of the Lagna is weak), will live for three fortnights or three months.

अंशाधिपजन्मपती लग्नपतिश्चास्तमुपागता यस्य ।
जन्मावसरे मरणं तस्य भवेत्कतिपयाहेन ॥३५॥

Sloka 35.—One, in whose nativity the lords of the Lagna, the sign occupied by the Moon and its Navamsa Rasi are all eclipsed, will die in a few days.

सन्धिचतुष्टयकाले जन्तोर्मृत्युं समादिशेत्तज्ज्ञः ।
पापयुतो दृष्टो वा चन्द्रः सौम्यैरदृष्टयुतः ॥३६॥

Sloka 36.—A wise man should predict the death of beings born at the four types of junctions, or when the Moon is conjoined with or aspected by a malefic, and when no benefics are in conjunction with or are aspecting her.

For सन्धि चतुष्टय see सं-नि-III-23.

उदयात्मजास्तरन्ध्रनवमव्ययसंस्थितः सपापेन्दुः ।
मरणमवश्यं कुरुते सौम्यग्रहवीक्षितो युतो न स्यात् ॥३७॥

Sloka 37.—If the Moon be aspected by or conjoined with malefics and not benefics, or if she be associated with malefics and occupies the Lagna, the 5th, 7th, 8th, 9th or 12th house and at the same time be not aspected by or conjoined with benefics, she will certainly bring about the death of the native.

लग्नाधिपजन्मपती षष्ठाष्टमरिःफगौ प्रसवकाले ।
अस्तमितौ मरणकरौ राशिप्रमितैर्वदेद्वर्षैः ॥३८॥

Sloka 38.—If the lords of the Lagna and the sign occupied by the Moon be posited in a nativity in the 6th, 8th or 12th house, or be eclipsed, they will conspire to destroy the native in as many years as the number of the Rasi they occupy denotes.

षष्ठाष्टमगे चन्द्रे लग्ने लग्नाधिपे दिवाजातः ।
दृष्टे शुभाशुभखगैः कृष्णेन्दौ वाऽपि सोऽल्पायुः ॥३९॥

Sloka 39.—When the Moon is posited in the 6th or the 8th house and the Lagna is occupied by its lord, or when the waning Moon is aspected by both benefics and malefics, one born by day will be short-lived.

लग्नाधिपतिश्चन्द्रो मरणपदस्थो हि कृष्णतां यातः ।
राहुयुतो दृष्टो वा निधनं स्यात्सप्तमे वर्षे ॥४०॥

Sloka 40.—The lord of the Lagna or the waning Moon occupying the 8th house and being aspected by or conjoined with Rahu, will cause the native's death in the 7th year.

क्षीणं यदा शशाङ्कं पश्येद्राहुः समागतः क्रूरैः ।
जन्मेशेऽस्तमयस्थे निधनं षष्ठाष्टमे वर्षे ॥४१॥

Sloka 41.—When Rahu associated with malefics aspects the weak Moon, or when the lord of the sign occupied by the Moon is eclipsed (or occupies the 7th house), the native will die in the 6th or the 8th year.

होराधिपतिर्द्यूने राहुयुतो मरणमेव विदधाति ।
दिवसैस्त्रिसप्तसंख्यैर्मासे वर्षेऽथवा नियतम् ॥४२॥

Sloka 42.—The lord of the Lagna occupying in conjunction with Rahu the 7th house causes certain death in 21 days, months or years.

अर्केन्दुयोगराशिः पापयुतो यस्य केन्द्रनवमस्थः ।
निधनं कुरुतेऽवश्यं विषजलयोगान्न सन्देहः ॥४३॥

Sloka 56.—When the Moon is not waning, occupies a friend's house or Amsa or her exaltation Rasi or Amsa, and is posited in the 11th house or the Lagna, and Saturn in strength is in the 9th house, the person born under this Yoga will live for countless years.

गुरुमन्दावेकस्थावेकांशगतौ स्वधर्मकर्मस्थौ ।

Sloka 57.—When Jupiter and Saturn are conjoined and occupy the same degree in the 2nd, 9th or the 10th house, and the Sun along with Mercury is rising, the person born will be a favourite of sages and long-lived.

अतिदीर्घायुर्योगे जातो मुनिवज्जितेन्द्रियो भूत्वा ।
दिव्यौषधप्रयोगाद्बिल प्रविष्टः करोति मन्त्रजपान् ॥५८॥

Sloka 58.—One born under a Yoga for inordinately long life will have the senses under control like a sage, be repeating sacred hymns and dwell in a cave by the application of divine medicines.

This shows that our ancients possessed means whereby they could make their bodies small or big, light or heavy, etc.

Sloka 59.—I have thus stated the above Yogas expounded by the Yavanas (Greeks) with the help of my previous Karma (actions). The cumulative effects of the Yogas will have to be declared in the untoward periods during the Dasas and their Bhuktis, after carefully analysing all the Yogas.

Thus ends the 6th Adhyaya on the 'Ascertainment of longevity under Special Yogas.'

सप्तमोऽध्यायः

अथ तेषां योगानामेकतमास्मिन्नगाश्च ये जाताः ।
तेषां दशानुनयनं स्पष्टं वक्ष्यामि यत्नतश्चाहम् ॥१॥

Sloka 1.—I shall now explain clearly and carefully the method of arriving at the exact Dasa-periods for those that are born under any one of the Yogas shown in the previous Chapter

मययवनसिद्धसेनप्रबोधमाण्डव्यविष्णुगुप्ताद्यैः ।
आयुर्दायविभागो नृणां सम्यक् पुरातनैः कथितः ॥२॥

Sloka 2.—The various systems of computing men's (total life period contributed by the planets) have been well expounded by the ancients such as Maya, Yavana, Siddhasena, Prabodha, Mandavya and Vishnugupta.

Pindayus

एकोनविंशतिसमा भानोश्चन्द्रस्य पञ्चकृतिरब्दाः ।
भौमस्य तु तिथिसंख्या बुधस्य षट्कद्वयं विनिर्दिष्टम् ॥३॥
पञ्चदशाब्दाश्च गुरोः शुक्रस्याप्येकविंशतिः कथिताः ।
मन्दस्य विंशतिसमाः परमोच्चस्था ग्रहाः प्रयच्छन्ति ॥४॥

Slokas 3-4.—When the planets, the Sun and others, are in their highest exaltation degrees, they contribute in their order 19, 25, 15, 12, 15 21 and 20 years towards a man's total life-period.

स्वोच्चादर्धं नीचे तदन्तरस्थेऽनुपाततः कल्प्यम् ।
विधिनैवं खचराणां दशानुनयनं क्रमेण कर्तव्यम् ॥५॥

Sloka 5.—A planet occupying its lowest debilitation-point contributes only half the number of years given above; the number of years it contributes when it occupies an intermediate position (between debilitation and exaltation) will have to be found out by the rule-of three process. In this manner, the Dasa-periods of all the planets in their order have to be calculated.

नीचोच्चविवरगतिं स्वदशापिण्डेन ताडयेद्धीमान् ।
षष्ठ्यादिशेषणीयं वर्षान्तं कल्पयेद्यथान्यायम् ॥६॥
यद्युच्चान्तिकविवरं पिण्डाच्छोध्यं ग्रहस्य तस्यायुः ।
नीचसमीपाद्विवरं पिण्डार्धयुतं ग्रहस्य तस्यायुः ॥७॥

Slokas 6–7.—A wise astrologer should multiply the difference in degrees between a planet's debilitation-point and its actual position in the nativity by one half of its total number of Pindayurdaya years and then deduce the period of Ayurdaya contributed by the planet.

मूढारिदृश्यहरणं युद्धासुरसंनिकर्षहरणं च ।
हरणानि ज्ञात्वैवं गुरूपदेशेन कर्तव्यम् ॥८॥

Sloka 8.—Deductions such as are for planets that are eclipsed, that are in inimical houses, and that are the visible half of the zodiac, as well as for those that are at war and those that are in close proximity to Rahu (?), will have to be made after ascertaining them from the preceptor's instructions.

तस्यैवमंशकदशामेवं कृत्वा व्ययादिहरणं च ।
पूर्वदशासु समार्धं त्यक्त्वा शेषं ग्रहस्य शुद्धायुः ॥९॥

Sloka 9.—The life-period according to the Amsa-yurdaya-system should thus be calculated by the above method and the deductions for planets posited in the six Rasis beginning with the 12th house counted backwards will have also to be made likewise. Leaving off an exact half of the years contributed by those planets which are under the above circumstances, *viz*, eclipse, debilitation, etc., the remaining should be taken as the net period of years contributed by the several planets towards the longevity of the person.

Sloka 10.—When malefics occupy the six signs beginning with the 12th house counted backwards, deductions from their contributions will have to be made in the order of 1, $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{5}$, and $\frac{1}{6}$ respectively ; when benefics occupy these houses, the reductions enjoined are a half of the above ones in the several houses; when both benefics and malefics are combined in these houses, the reductions due to the malefics alone need be made; and when more than two planets are posited in a house, the reduct-on due to the strongest of them alone should be made and not for the others.

भङ्गे त्रिकांशमथवा सुरसंनिकर्षे
चन्द्रार्कयोः क्षयमुपैति तदर्धकार्धम् ॥११॥

Sloka 11.—All planets except Mars occupying inimical houses will lose a third of their contribution; one eclipsed will lose half of its contribution execpt Venus and Saturn; one defeated in a planetary fight will lose $\frac{1}{3}$; and the Sun and the Moon in conjunction with Rahu (or Ketu?) lose $\frac{1}{12}$ th of their contribution.

होरादशा तु विधिना परिकल्पिता स्यात् ॥१२॥

Sloka 12.—The Lagna contributes as many years as the number of the Navamsa (counted from Mesha) progressed by the lord of the Lagna. When the Lagna is strong and is occupied by a strong benefic, the years should be increased by a ¼th of the Ayus obtained. The Ayus should be quadrupled when the lord of the Lagna is conjoined with benefics or friends. When the Lagna is weak or conjoined with malefics, a fourth of the Ayus should be deducted. Thus should the Dasa of the Lagna be calculated.

उच्चनीचविधिनायुराप्यते यत्र सम्यगधियोगसंभवः ।
सद्गृहत्वमुपगच्छति लग्नं यत्र चास्तभवनं ग्रहयुक्तम् ॥१३॥

Sloka 13.—The longevity is correctly arrived at by calculating a planet's exact position from its exaltation and debilitation, where there is some benefic conjunction, or when the Lagna is strong and is a benefic house, or when the 7th house is occupied.

Another interpretation :—Where there is good planetary conjunction for the Lagna, the Ayus is obtained by उच्चनीचविधि. The Lagna becomes strong and benefic when there is a planet in the 7th house.

उच्चनीचदशामार्गं सामान्यं सर्वदेहिनाम् ।
दशासंस्कारभेदेन द्विप्रकारं प्रचक्षते ॥१४॥

Sloka 14.—The method of finding the total life-period of a person by the उच्चनीच process is common to all beings; but, it is of two kinds on account of the difference between Dasa and Samskara (process of rectification by proper deductions, etc.)

कुर्याद्दशासु संस्कारमंशकैर्बलवत्तरैः ।
तयोर्बलाबलेनैव कल्पयेन्मतिमान्नरः ॥१५॥

Sloka 15.—For the various Dasa periods, rectification or deductions (संस्कार) will have to be made through the strongest of the Navamsas. And this will have to be made by an intelligent astrologer after considering the relative strength of the two.

Amsayus.—अथांशायुः

राश्यंशकला गुणिता द्वादशनवाभिर्ग्रहस्य भगणेभ्यः ।
द्वादशहृतावशिष्टं वर्षाद्युपलक्षितं यथान्यायम् ॥१६॥

Sloka 16.—The figures of a planet in signs, degrees, minutes are to be multiplied by 108 and divided by 12. The remainder will indicate according to the rule the years, etc., contributed by the planet.

स्वांशत्रिभागनिजगृहवर्गोत्तमसंस्थिते द्वयं गुणकः ।
वक्रोच्चयोस्त्रिगुणितं नीचेऽर्धं क्षीयते विशेषेण ॥१७॥

Sloka 17.—When a planet occupies its own Navamsa, Drekkana, Rasi, or Vargottama Navamsa, the multiplier is 2. The Ayurdaya has to be trebled when the planet is retrograde or is in exaltation, and halved when the planet is in depression.

पूर्वोक्तहरणमस्मिन् कुर्याद्भौमस्य शत्रुहरणं च ।
उदितनवांशकसदृशानब्दानुदयस्य कल्पयेन्मतिमान् ॥१८॥

Sloka 18.—The deductions referred to above in connection with Pindayus must be done here too except for Mars and also while occupying an inimical house. And an intelligent astrologer should allot as many years for the Lagna as there are Navamsas that have risen in it.

Also see जा–पा V.8.

Sloka 19.—Of the several kinds of Ayurdaya, the Amsayurdaya system should be adopted when the Lagna is strongest; the Pinda one when the Sun is powerful and the Nisargajayus when the Moon is endowed with full strength.

क्षेत्रोच्चमित्रभागे ग्रहैः समस्तैस्तदांशजनितश्च ।
अर्केन्दुलग्नरहितैर्ग्रहैस्तदांशोद्भवो दशामार्गः ॥२०॥

Sloka 20.—When all the planets are posited in their own houses, exaltation signs or friend's houses or Navamsas, then the Amsayurdaya system should be adopted ; so also will be the case when planets are not associated with the Sun, the Moon or the Lagna.

अपरं दशानुनयनं स्वकीयमार्गेण जीवशर्मोक्तम् ।
तस्मादायुर्दायं वक्ष्ये विषयप्रकारं च ॥२१॥

Sloka 21.—There is another method of finding out the Dasa (total life - period) expounded by Jeevasarman according to his own doctrine. (A planet contributes according to him, one-seventh of the maximum period of of man's existence *i. e.*, 120 years, 5 days.) Hence, I shall now treat of that system of Ayurdaya and also the procedure for calculating the same.

Sloka 22.—Find the difference between a planet's actual position and its debilitation-point and convert the same into minutes. Divide the result by 21600. The quotient thus obtained will give the years. Multiply the

remainder by 12 and divide the product by 21600 and the quotient will reveal the months. Again multiply the remainder by 30 and divide the product as before. The quotient will give the days. Now multiply the remainder got, by 60 and divide as before, and the quotient will give the Ghatis.

Sloka 23.—If the planet occupies a position close to its exaltation point, subtract the figure representing its position from 17 years, 1 month, 22 days, 8 ghatikas and 34 Vighatikas. If it is near its debilitation-point, then the difference should be added to them.

हरणं यत्पूर्वोक्तं प्रथमेऽप्यत्रापि कारयेत्प्राज्ञः ।

होरायामुदितांशप्रमाणमायुर्ददाति लग्नं च ।

Sloka 25.—The Lagna contributes for a man's life as many years as there are Navamsas that have risen. If there should be a malefic posited in the Lagna, the contribution for the Lagna will have to be reduced by one-fourth. If, on the other hand, a benefic occupies it, the contribution should be enhanced by a fourth.

Slokas 26-27—In the opinion of Jeevasarman, if there be planets occupying both the 2nd and the 12th houses from the Lagna or from the Moon, or if Jupiter occupy the 10th or the 4th house, if all the planets be near their debilitation point and be weak, or be posited in the Lagna or the 7th house, the contribution of each of the several planets will have to be fixed at $\frac{1}{7}$th of the total period of human life.

अथ भिन्नाष्टवर्गे त्रिकोणशोधनम्-

Trikona reduction in Bhinnashtakavarga.

राशिचक्रं यथामार्गं निक्षिप्येष्टग्रहस्य च ।
त्रिकोणशोधनं कुर्यादादौ सर्वेषु राशिषु ॥२८॥

Sloka 28.—Drawing the Rasi-chakra as usual and putting the benefic dots of the Ashtaka Varga of the planet required, the Trikona reduction should first be gone through for all the Rasis.

त्रिकोणास्तु कथं प्रोक्ता मेषसिंहहयाः क्रमात् ।

भवनद्वयशून्यत्वे शोधयेदन्यमन्दिरम् । ३१॥
समत्वे सर्वगेहेषु सर्वं संशोधयेद्बुधः ।

Slokas 29-31.—Mesha, Simha and Dhanus; Vrishabha, Kanya and Makara; Mithuna, Tula and Kumbha; and Karkataka, Vrischika and Meena are called Trikonas

among themselves or to one another. In the Trikonas, whichever figure is least, the same should be substituted in the other two. If one of the three be void of benefic dots, no reduction need be made If two out of the three be vacant, remove the figure in the third also. If all the three houses should have equal number of dots, remove all the three figures.

अथैकाधिपत्यशोधनम्

एवं त्रिकोणं संशोध्य पश्चादेकाधिपत्यजम् ॥३२॥

एकस्मिन् भवने शून्ये न संशोध्यं कदाचन ।
कुलीरसिंहयो राश्योः पृथक क्षेत्रफलं स्मृतम् ॥३७॥

Slokas 32-37.—Having thus done the reduction in respect of Trikonas, one should do that for those pairs of Rasis having a common lord in the way described below: Should the two houses owned by a planet both contain benefic dots it is only then that a wise astrologer should resort to this reduction. When one of the signs owned by a planet contains a smaller number of benefic dots than the other which is void of any planet, the smaller number should be adopted for both the signs. When the sign

occupied by a planet contains a greater number of benefic dots than the other having no planet in it, remove all the dots from the latter. If there be an equal number of benefic dots in both the houses owned by a planet and if one of them alone be occupied, remove all the dots from the other. When both the houses are occupied by planets, no reduction need be made. When both the signs are without planets and contain an equal number of benefic dots, remove the dots from both. If one of the houses be devoid of benefic dots, no reduction need be effected. The benefic dots in the signs Karkataka and Simha should not be disturbed, but kept in tact.

राशिगुणाकार:— Rasi multipliers.

शेषाः स्वसंख्यागुणिताः राशीनां गुणकाः स्मृताः ।

Slokas 38-39½.—The resultant figures remaning after the above-mentioned two reductions in the several signs are to be multiplied each by its corresponding Rasi-multiplier. If a particular Rasi be occupied by a planet, then the number of benefic dots should be further multiplied by the respective planet-multiplier. The Rasi-multiplier for Vrishabha and Simha is 10; for Mithuna and Vrischika, 8; for Mesha and Tula, 7; for Kanya and Makara, 5 ; and the multipliers for the remaining signs are Karkataka, 4, Kumbha, 11, Dhanus, 9 and Meena, 12.

राशीनां गुणकारैश्च फलानि गुणयेत् पृथक् ॥४१॥
सति तत्र ग्रहैर्युक्ते गुणयेद्ग्रहसंख्यया ।

Slokas 40-41½.—The multipliers for Jupiter, Mars, Venus and Mercury are 10, 8, 7 and 5 and for the rest, it is the same as for Mercury, *i. e.*, 5. The Rasi-multipliers and planet-multipliers should be treated separately. The benefic dots in the several Rasis should be separately multiplied by the Rasi-multiplier. If there is a planet also in the Rasi, the number of benefic dots should be multiplied by the planet-multiplier.

अथ ग्रहायुः—Planets' Contribution to Life.

तद्भागशुद्धाः संग्राह्या मण्डलाधिकवत्सराः ।

Sloka 42-44½.—Having thus multiplied separately and added the products, the result should be multiplied by 7 and divided by 27. The quotient will represent the number in years contributed by the planet. When the remainder is multiplied by 12 and divided by 27, we get the number of months Similarly, when the remainder now obtained is multiplied by 30 and divided by 27, we get the number of days ; and lastly, when the last remainder is multiplied by 60 and divided by 27, we get the number of Ghatikas. 27 years constitute a Mandala. When a figure divided by 27 yields a remainder, the remainder alone should be taken as the number of years contributed.

पश्चात्संयोज्य तत्सर्वं वाराङ्केन विवर्धितम् ।
मातङ्गलब्धं शुद्धायुर्भवतीति न संशयः ॥४८॥

Slokas 45-48.—When a planet is conjoined with another, the contributions of both the planets should be reduced by a half. If a planet be debilitated or eclipsed, then also it will lose half its contribution. A planet posited in an enemy's house will lose $\frac{1}{3}$ of its contribution. The reduction in the contribution of planets that are posited in the visible half of the zodiac will have to be made as before. For a planet vanquished in planetary war or occupying a position within the (पात) range of the Sun and the Moon, a reduction by a third should be made. When several reductions crop up for a single planet, only the greatest need be done. The figures for the several planets should be added up and multiplied by 324 and divided by 365. The quotient got will be undoubtedly the net Ayus contributed by all the planets.

पूर्ववद्दिनमासाब्दं कृत्वा तस्य दशा भवेत् ।
एवं ग्रहाणां सर्वेषां दशां कुर्यात् पृथक् पृथक् ॥४९॥

Sloka 49.—The Dasa of each planet in terms of years, months, days etc., should be found out in the above manner. Thus should the Dasas of all the planets be found out separately.

अष्टवर्गदशामार्गः सर्वेषामुत्तमोत्तमः ।
केन्द्रेष्वन्यतमस्थे शशिनि ग्रहसंयुतेऽष्टवर्गेण ।
आयुर्दायं कुर्याद्दशमर्क्षे क्रूरसौम्ययुते ॥ ५० ॥

Sloka 50-50½.—Of all the systems of Dasas (Ayus), the Ashtakavarga one is the very best. One's Ayurdaya should be computed by the Ashtakavarga process, when the Moon in conjunction with a planet is posited in one of the Kendras, and the 10th house is occupied by both benefics and malefics.

अथ समुदायाष्टवर्गायु :—

Sloka 51.—Find the total of all the benefic dots in each of the Rasis of the 7 Ashtakavargas, and you get the Sarvashtaka varga figures. Now, effect first the Trikona reduction as before and then, the Ekadhipatya one.

एकस्मिन् मण्डलाधिक्ये शोधयेच्चक्रमण्डलम् ।
द्वादशैव तु गृह्णीयादेवं सर्वेषु राशिषु ॥५२॥

Sloka 52.—If the figure in any Rasi exceed 12, then subtract from it 12 or multiplies of 12 (if necessary) and keep the remainder in tact. All the Rasis should be similarly treated.

पूर्वोक्तगुणकारैस्तैर्वर्धयेच्च पृथक् पृथक् ।

सप्तविंशत्या च भाज्यं लब्धमायुः प्रदृश्यते ।
द्वादशादिगुणं शिष्टं मासाद्यं हारभाजितम् ॥५४॥

Slokas 53-54.—These should then be multiplied by their respective Rasi and Graha multipliers and their sum-

total should be further multiplied by 7 and then divided by 27. The quotient will reveal the requisite Ayus in years, months, days, etc.

शतोर्ध्वं यदि तत्पिण्डं मण्डलोनाव (100) शेषयेत् ।

Slokas 55-56.—When the figure exceeds 100, remove as many hundreds as may be necessary. If the native be declared as long-lived, then 100 alone should be taken. The Ayus should then be rectified by multiplying the same by 324 and dividing by 365.

सर्वग्रहेभ्यः शुद्धायुः पिण्डरूपं विनिर्दिशेत् ।
ग्रहाणां तु विभागार्थमुपायस्त्विह कथ्यते ॥ ५७ ॥

Sloka 57.—The rectified Ayus got from all the planets should be shown in a collective form. The actual contributions derived from each of the several planets should be ascertained in the following manner.

व्यस्ताष्टवर्गकदशा चैकीभूता घटीकृता ।
तमेव हारं सर्वेषामनष्टं स्थापयेत् क्वचित् ॥ ५८ ॥

Sloka 58.—The Dasa-periods obtained through the Bhinnashtakavarga process should be totalled and converted into Ghatikas and this figure should be preserved as it is (without any reduction) for being used as divisor in the case of all planets.

समस्ताष्टकनाड्यस्तु भिन्नाष्टकदशाहताः ।
भागहारहृताल्लब्धं ग्रहस्यायुर्भविष्यति ॥ ५९ ॥

Sloka 59.—The total Ashtakavarga Ghatikas referred to above should be multiplied by the several Bhinnashtakavarga Dasa-periods and then divided by the divisor aforesaid. The quotient will reveal the years contributed by the planets.

दिनमासाब्दपर्यन्तं कृत्वा पूर्ववदाचरेत् ।
एवं ग्रहाणां सर्वेषां शुद्धायुः स्यात् पृथक् पृथक् ॥ ६० ॥

Sloka 60.—The days, months and years should be computed as mentioned above. Thus should be calculated the exact periods of Ayus contributed by each of the several planets.

समुदायदशामार्गे एवं क्रम उदाहृतः ।
राशितुल्यानि वर्षाणि प्रयच्छन्त्युदयो बली ॥ ६१ ॥

Sloka 61.—The process of finding out the Dasa-periods of the several planets through the figures in the Sarvashtakavarga has been already explained. When the Lagna is strong, it contributes as many years as are signified by the Lagna Rasi.

उभयत्रापि विज्ञाय लग्नदायं विनिर्दिशेत् ।
अष्टवर्गदशामार्गं सर्वेषां संमतं विदुः ॥ ६२ ॥

Sloka 62.—It is only after ascertaining by both the methods that one should fix up the years contributed by the Lagna. The process of finding out the Dasa-periods through the Ashtakavarga method is acceptable to all.

गृहैक्यस्य दशाभावे भेदमार्गे प्रकल्पयेत् ।
तदोच्चनीचमार्गेण दशां कुर्याद्विचक्षणः ॥ ६३ ॥

Sloka 63.—In the case of any difficulty in ascertaining the Dasa-periods of planets owing to their being conjoined with other planets, a different method should

be resorted to. A clever astrologer should calculate the Dasas of the planets through their exaltation and depression positions.

नीचारिभवनयातैर्ग्रहैः समस्तैस्तदंशगैर्वाऽपि ।

Sloka 64.—In the case of planets occupying depression, or inimical Rasis or Amsas, a wise astrologer should determine the contributions of the planets according to the method laid down by Sage Yavana.

ग्रहसहिते केन्द्रस्थे चन्द्रे केन्द्राद्बहिः स्थितैः शेषैः ।
समुदायाष्टकविधिना ग्रहदायं कल्पयेन्मणित्थमतात् ॥ ६५ ॥

Sloka 65.—When the Moon occupies a Kendra house in conjunction with another planet, and when the other planets are posited outside the Kendra houses, one ought to adopt the Samudayashtakavarga method for ascertaining the contributions of the several planets. This is the view of Manittha.

एकत्र गतैः सर्वैः केन्द्रादन्यत्र संस्थितैर्जन्तोः ।
आयुर्दायविभागैर्दशाफलं ज्ञायते नैव ॥ ६६ ॥

Sloka 1.—Of the Lagna, the Sun and the Moon, whichever is strongest, his Dasa comes first. Then follow in their order of strength those that are situated in the Kendra and other houses. If they possess equal strength, that which gives a larger number of years will lead. If there be equality even in the number of years contributed, that which rises first after the next conjunction will take

precedence; and when the risings are also simultaneous, that which has the first mention will have the lead.

वयोमुखेषु त्रिषु च त्रयः स्युर्लग्नार्कचन्द्रा बलसन्नियोगात् ।

आरोहिणी स्वोच्चमुखाभिलाषे क्रमेण सर्वं फलमातनोति ॥ ६ ॥

Sloka 7.—In the case of a planet whether exalted, in a friend's Rasi or Amsa, in depression, in an inimical sign, or in an eclipsed state, the effects of the Dasa will only be mixed. At the latter half of the Dasa, it will prove auspicious.

सविता दशाफलानां प्रापयिता चन्द्रमाः प्रबोधयिता ।
आदित्यचन्द्रवशगाः सर्वे ताराग्रहा ज्ञेयाः ॥ ८ ॥

दशमोऽध्यायः

अथ चन्द्रदशाफलम्

सामान्येन तु षोढा चन्द्रदशा कथ्यते मणित्थाद्यैः ।
शुक्लस्य प्रथमतिथेरारभ्यारोहिणी दशा शशिनः ॥ १ ॥

Sloka 1.—The Moon's Dasa aud its effects are generally classified in six ways by sage Manittha and others. The Dasa is declared to be waxing or increasing in the case of the Moon from the first lunar day onwards.

जलधिजलोत्थितिकाले नॄणां सूतौ दशा शशाङ्कस्य ॥ २ ॥

Sloka 2.—From the Dwitiya Tithi in the dark half (16th lunar day) till the end of the New Moon, (the

birth may happen at any time within this interval) the Moon's Dasa is known as अवरोहिणी or descending. Should a birth take place at a time when the waves of the ocean are rising,

आरोहिणीति विदिता विपरीता सावरोहिणी ख्याता ।
नीचाच्च्युतस्य हि दशा हिमगोरारोहिणी कथिता ॥ ३ ॥

Sloka 3.—it is termed आरोहिणी or ascending. If it be contrarywise, it is called अवरोहिणी. Where the Moon has left his नीच or depression, then also her Dasa is known as आरोहिणी.

तुङ्गाच्च्युतस्यं तु दशाऽवरोहिणी निगदिता शशिनः ।
रोहावरोहभेदः सम्यक् त्रिविधः पुरातनैः कथितः ॥ ४ ॥

Sloka 4.—If at a birth the Moon has fallen from her exaltation, her Dasa is termed अवरोहिणी- descending. The difference between आरोह and अवरोह is distinguished in three ways by the ancients.

अशुभास्ते शुभं दद्यू रवेरेवं शशी यथा ।

Slokas 5-6½—There are three kinds of आरोह (Aroha) in the Moon's Dasa well-known to all. They bring on success in everything. When the अवरोह (Avaroha) Dasa begins to dawn, there will be naturally decay in everything for the person concerned.

When the Moon is endowed with the minimum strength, and the planets are all in lunar Hora, though malefic in character, they give good effects. During the Sun's Dasa

when he is in a similar situation he will prove auspicious like the Moon.

देवद्विजमन्त्राद्यैर्धनवान्विनयान्वितः कलाज्ञश्च ॥७॥

बलवान् स्वजनविरोधी निद्रालस्यं मदान्वितः क्षीणे ।
सामान्यमेतदुक्तं प्रतिराशिफलं यथाक्रमं वक्ष्ये ॥ १० ॥

Sloka 10.—He will possess bodily strength, will hate his own relations, will be sleepy and lazy, intoxicated and powerless. The general effects have thus been

described. I shall give in detail the separate effect due to the Moon occupying each of the several Rasis.

मेषाश्रितचन्द्रदशा स्त्रीसुतलाभं विदेशकर्मरतिम् ।

वयसो मध्यमभागे चन्द्रदशायां महासुखी धनवान् ।
द्विजदेवमन्त्रिभावैः सम्पन्नो युवतिवल्लभो भवति ॥ १४ ॥

Sloka 14.—During the middle portion of the Moon's Dasa, the person concerned will be in the height of his happiness and command immense wealth. He

will be moving with Brahmins and Gods and become the favourite of his wife.

In the last quarter नृपतिवल्लभो भवति is another reading.

पूर्वार्द्धे संभूतो जननीमृत्युकरोऽतिपापरुतः ।
पश्चादर्द्धे वृषभे पितुर्वियोगं शशी कुरुते ॥ १५ ॥

He will be skilled in Astrology and other sciences. He will suffer from trouble in the anus. He will be roaming through forests, mountains and fortresses.

Slokas 1-2—The several places reckoned from each of the several planets should be indicated by figures, the 10th one being represent by zero commencing with the Sun, etc., and ending with the Lagna in the several formulas, by writing on the ground the Rasi chakra.

स्वेषु स्वेष्वष्टवर्गेषु ग्रहाणां च पृथक् पृथक् ।

ग्रहादिना फलं ज्ञात्वा निर्दिशेच्च पृथक् पृथक् ।

Slokas 3-3½—The 12 kinds of the Dasa periods arising for the 12 houses should be separately entered for each of the several planets, and their effects determined.

Slokas 4-6—In the case of houses containing no benefic dots—houses owned or occupied by inimical planets, houses which are depressed (*i. e.*, occupied by planets in depression)—the person will without fail suffer diseases, and untoward happenings. When there are 1, 2, or 3 benefic dots in a Rasi, there will be loss of wealth, corn or death of cattle. If there be four dots, the effects

will be medium, and the Dasa then will also be middling. If the dots be 5 or more, the effects arising from that house will all be auspicious

क्षेत्रोच्चोपचयस्थाने फलमेतदुदाहृतम् ।
पूर्वोक्तमार्गेण शुभमष्टवर्गं विनिर्दिशेत् ॥ ७ ॥

Sloka 7.—The effects should thus be predicted in the case of planets occupying their exaltation, own or Upachaya houses. The effects of benefic dots should be determined in the manner stated already.

शुभानि द्विगुणं कुर्युरन्यथा चान्यथा भवेत् ।
एवं द्वादशमूर्त्यादिस्थानेषु च दशाफलम् ॥ ८ ॥

Sloka 8.—The effects will be two-fold auspicious in good houses and two-fold bad, in bad houses. The extent of the effects in the 12 Bhavas beginning from the Lagna should be judged in this manner.

मूर्तेः शरीरसम्पत्तिमङ्गोपाङ्गनिरूपणम् ।

द्वादशं तु व्ययस्थानं पापस्थानं प्रचक्षते ।
एवं द्वादशभावेषु चिन्तयेन्मातिमान्नरः ॥ १५ ॥

Slokas 9-15.—One's bodily growth or otherwise should be examined from the Lagna. Truthfulness, luck and wealth from the 2nd house. Voice, energy, valour and brothers, from the 3rd house; happiness, relations, qualities and mother should be determined through the 4th; one's nature, intelligence and children, from the 5th; one's Dayadis, enemies, wounds, etc, from the 6th; progeny, marital gains, diseases, death and destruction, are to be declared from the 8th; about fortune, elders and virtue, from the 9th; occupation and living, from the 10th; it is from this house that one has to seek for information about one's valour, prowess, learning and fame; all—seen and heard—about him should also be ascertained from this house. The 12th is called the house of expenditure. It is also called the house of sin It is in this manner that an intelligent astrologer should examine the twelve houses.

पापान्वितास्तु ये भावास्ते भावाः स्युर्विनाशिनः ।
सौम्याः सिद्धिकरा ज्ञेया मिश्रा मिश्रफलप्रदाः ॥१६॥

Sloka 16 – Houses occupied by malefics produce unfavourable effects; while if by benefics, they give good results. The effects will be medium, when the planets also are of medium nature.

मित्रोच्चभवनस्थश्चेत्पापः शुभफलं दिशेत् ।
अरातिनीचभस्थश्चेच्छुभः पापफलं दिशेत् ॥१७॥

Sloka 17.—If a planet occupy a friendly or exaltation house he will, though malefic, produce good effects. If he should be in his depression or inimical house he will, even if benefic, will give bad results.

एवमादिफलैः साद्धं दशाफलमुदीरयेत् ।
आत्मप्रभावशक्तिश्च पितृचिन्ता रवेः फलम् ॥१८॥

Sloka 18.—It is only after examining these, the astrologer should predict the effects of the planet's Dasa. Anything about one's own self, influence, and vigour should be divined through the Sun.

मनो बुद्धिप्रसादश्च मातृचिन्ता तु चन्द्रतः ।
भ्रातृसत्त्वगुणान् भूमिं भौमेन तु विचिन्तयेत् ॥१९॥

Sloka 19.—It is the Moon that determines the character of one's mind, royal favour and mother. It is through Mars that a person can ascertain his own courage, characteristic qualities, and lands.

प्रज्ञावाक्कर्मविज्ञानं बुधेनैव विनिर्दिशेत् ।
गुरुणा देहपुष्टिं च बुद्धिपुत्रार्थसम्पदः ॥२०॥

Sloka 20.—It is Mercury that influences one's speech, action and discrimination. One ought to conjecture about one's physical development, genius, sons and wealth through Jupiter.

शुक्राद्विवाहकर्म स्याद्भोगस्थानं च वाहनम् ।
आयुश्च जीवनोपायो मरणं च शनैश्चरात् ॥२१॥

Sloka 21.—Information regarding one's marriage, love affairs and vehicles is to be sought through Venus. It is Saturn that settles a person's period of life, livelihood and death.

बलहीना ग्रहा ये स्युर्जन्मकाले सदा नृणाम् ।
तेषामुक्तं फलं हीनं विपरीतं शनेः स्मृतम् ॥२२॥

Sloka 22.—Where planets are weak at one's birth, their effects also will be weak; the reverse will be the case with regard to Saturn.

स्वेषु स्वेष्वष्टवर्गेषु ग्रहोक्तफलमादिशेत् ।
अष्टवर्गादृते नैव दशाज्ञानं भवेत् ध्रुवम् ॥२३॥

Sloka 23.—All the planets reveal the r effects in proportion to the number of benefic dots in the houses occupied by them. Without the aid of Ashtakavarga, it will not be possible to determine the exact nature of the effects in the native's several Dasas.

आदित्याष्टकवर्गे च निक्षिप्याकाशचारिषु ।

तत्त्रिकोणगते वाऽपि पितुः पितृसमस्य वा ॥२६॥
मरणं तस्य जानीयाद्दशाच्छिद्रमुदीक्ष्य च ।

Sloka 24–26½.—Find out the benefic dots revealed by the planets in the Sun's Ashtakavarga (of the native). The Rasi that is ninth from that occupied by the Sun is said to denote the house of his father; The शोध्यपिण्ड (*Vide* Sloka 36 *infra*) figure should be multiplied by the number of benefic dots in the house of the 'father'. The product should be divided by 27. When Saturn in his transit passes through the particular star revealed by the remainder, the demise of the father will surely happen. Or when Saturn transits a star triangular to the previous one, the father or a relative similarly placed will die Thus should the astrologer declare, after due verification, if the Dasa at the time be a छिद्र one.

चन्द्रलग्नाद् गुरुस्थानं याते सूर्यसुते सति ॥२७॥

पित्रोर्नाशस्तत्र काले वक्ष्यते चार्कचन्द्रयोः ।
दशानुकूलकाले तु योजयेत्कालवित्तमः ॥२८॥

Sloka 27-28.—When Saturn transits the 9th house reckoned from the Moon, the demise of the parents may be predicted at the time should the Dasas of the two luminaries be also in progress.

लग्नात्सुखेश्वरांशेशदशायां च पितृक्षयः ।
सुखनाथदशायां वा पितृनाशस्त्वसंशयः ॥२९॥

Sloka 29.—The demise of the father may also occur during the Dasa of the planet owning the Navamsa of the lord of the 4th house. Or, it may happen without doubt during the Dasa of the lord of the 4th house.

पितृजन्माष्टमे जातस्तदीशो लग्नगोऽपि वा ।
तेनैव पितृकार्याणि कारयेन्नान्यथा यतः ॥३०॥

Sloka 30.—Find out the owner of the 8th house reckoned from the 9th. When this or the planet occupying the Lagna has his Dasa in progress, the father's obsequies have to be performed and not at any other time.

शुभेशे लाभलग्नस्थे चन्द्रलग्नाद्विशेषतः ।
मित्रग्रहसमायुक्ते माता पितृवशानुगा ॥३१॥

Sloka 31.—When the lord of the 9th house occupies the 11th or the Lagna—especially when the counting is reckoned from the place occupied by the Moon—and is in conjunction with a friendly planet, the mother also follows the fate of the father.

Sloka 33.—One born in a Rasi which is the 10th from that of his father will have characteristic qualities similar to those of his father Even if the lord of that Rasi occupy the Lagna, he will excel his father in merit.

Sloka 34.—In the Ashtakavarga of the Sun when there is a Rasi devoid of dots, one should always avoid that month for purposes of marriage and similar topics.

कलहायासदुःखानि शून्यमासि च सन्ति हि ।

Sloka 35.—For, in a month void of benefic dots there may arise quarrels, weariness and misery; after knowing all these, one should prepare himself to meet the tide of events in that month.

Slokas 36, 36½.—The शोध्यपिण्ड figures in the Ashtakavarga of the Sun should be multiplied by the number of benefic dots in the 8th house and divided by 12. In the month signified by the remainder when counted from Mesha, or in its triangular Rasi, one's demise may be expected.

Sloka 37-37½.—When the Moon transits a Rasi void of benefic dots in the Ashtakavarga of the Moon, one should shun that asterism for celebrating all auspicious events.

चन्द्राष्टमे च नक्षत्रत्रितये च विशेषतः ॥ ३८ ॥
आयासव्याधिदुःखानि लभते नात्र संशयः

Slokas 38, 38½.—Note the asterism that is in the 8th house from that of the Moon. When the Moon in her transit arrives in that asterism or its triangular ones, one will invariably get worry, disease and misery.

चन्द्रात् सुखफलैः पिण्डं वर्धयेद्भैर्विभाजयेत् ॥ ३९ ॥

Slokas 39-40.—Multiply the शोध्यपिण्ड figures by the number indicating the benefic dots in the 4th house from the Moon aud divide the product by 12. When Saturn transits the star indicated by the remainder, the demise of the mother should be expected. The same event, may also be declared to happen when the transit takes place over an asterism triangular to the same or if there be a छिद्र Dasa at the time.

Slokas 42-43 —Note the lords of the 4th and 8th houses counted from the Moon, and the Navamsas occupied by them. When the Sun transits a Rasi triangular to the same, the demise of the mother may come to pass in that month. The above has to be determined from the father's Lagna Rasi. The events for the mother should be determined in the same way as for the father.

Sloka 45.—Similar reductions have to be made in the Ashtakavarga figures of Mercury. When Saturn transits the Rasi signified by the remainder, loss of issue, of friends and other untoward events will without doubt happen.

Sloka 46-47½.—From the Ashtakavarga of Jupiter, it is possible to fix up the issue that one will have. Find the number of benefic dots in the 5th house from Jupiter in his Ashtakavarga. The dots given by planets occupying their inimical and depression houses should be left out. The remainder will denote the number of issue. Note the Navamsa of the 5th house from Jupiter ; its order from Mesha will signify the number required ; or it may also be determined through the Navamsa (its order from Mesha) occupied by the lord of the 5th house.

Slokas 48-49.—In the Ashtakavarga of Jupiter, find the total number of dots after reduction. The dots contained in the several Rasis occupied by malefics should be left out The remainder will signify the number of the issue. Of these, the dots in the 12th, 8th and the 5th if occupied by malefics, will denote the number that die very early.

Slokas 50-50½.—In the Ashtakavarga of Jupiter, if there be 3 benefic dots in the 5th house, or in the Rasi which is 5th from Jupiter, the person concerned should be declared as issueless. But if the said house be occupied or aspected by its lord, the person will beget issue.

Slokas 51–52½.—It is by these and other various methods that the astrologer should solve the question. When the Yoga for progeny is clear, children will surely be born to the native. The Yogas for family-extinction will be described separately in a clear manner.

Slokas 53-55.—The number of benefic dots derived from the planets should be set up constituting the Ashtakavarga of Venus. The Trikona reduction should be effected, followed by the Ekadhipatya one. Whichever Rasis contain dots. the astrologer should declare lands, wife and wealth in proportion to their number. The number of dots contained in the 7th house reckoned from Venus will reveal the number of wives that one will have.

Slokas 56-58.—Note where the lord of the Navamsa occupied by the owner of the 7th house is posited. This Rasi will be the Janma Rasi of the wife. Some say that the planet's exaltation or Swakshetra may also denote the same. The wife's Janma Rasi may also be any one of the triangular houses with regard to that Navamsa. Some Sages declare that it is the 9th house counted from the Lagna or the Moon. A clever astrologer should guess the most suitable and probable one.

Slokas 59, 59½.—If the Janma Rasi of the wife be some other than that what has been mentioned above, it means there will be no progeny. The (number of) benefic dots in the houses occupied by the lords of the 9th and 7th houses represent the number of females one will have. The number will be treble in the case of Rasis and double in that of the Navamsa when these happen to own them.

Slokas 60-61½.—When Venus occupies a Navamsa of Saturn, is conjoined with Saturn or occupies a Rasi of Saturn, or is in a depression Navamsa, or is associated with a malefic, the person concerned will have sexual intercourse with a low woman. When Venus occupies a Navamsa or Rasi owned by Mars, or is associated with or

aspected by Mars, the person concerned will desire to have sexual intercourse with a woman other than his wife.

Slokas 63, $62\frac{1}{2}$.—When the Moon occupies the 7th or the 12th house and is in a Navamsa owned by a malefic, and when Venus is associated with a malefic, the person concerned will suffer degradation through a woman (at the bottom).

Slokas 64-$65\frac{1}{2}$.—The woman-partner will have the colour, form and qualities similar to those of the Navamsa occupied by Venus; or of the Navamsa occupied by the lord of the 9th or the 7th Thus, after ascertaining the preponderance of the number of benefic dots in the Ashtakavarga of Venus, one should arrive at the proper conclusion.

Slokas 66-68.—Prepare the Ashtakavarga of Saturn by finding the benefic dots contributed by the several planets. Add the dots in the houses between the Lagna and Saturn. Add also the dots between Saturn and the Lagna. In the years signified by the two totals, the person concerned will suffer diseases and misery. Add up the two totals. During the year denoted by this sum-total, the native may suffer death.

Slokas 69-70.—After doing the two reductions enjoined, make up the शोध्यपिण्ड. Multiply this by the dots in the 8th house and divide the product by 27. The quotient will reveal the Ayus of the native. From the remainder, the months, days, ghatikas, etc may be computed. If at the time thus revealed, there be also दशाछिद्र, then death will surely hapen.

Sloka 71.—In the Ashtakavarga of Saturn, if there be no benefic dots in any Rasi, it indicates disease or death. When the शोध्यपिण्ड product (*Vide* Slokas 69-70) is divided by 12, and when the Moon transits the sign thus revealed, one may predict death.

Slokas 78-79.—A good astrologer should select only those Rasis which contain good number of benefic dots for celebrating anything auspicious. He, in whose Ashtavarga the benefic dots in the Lagna exceed that of the

12th will enjoy life and be rich. When it is otherwise, poverty will without doubt encircle him. From 25 to 30, it will be middling. After that it is only good that will prevail.

From the beginning of Karkataka to the end of Tula, it is known as the third Khanda. Slokas 84-85½.—In the case of excess of benefic dots, something auspicious should be expected, while when the dots are low in number, matters that are bad will spring up. It is only after noting the three Khanda periods, the Dasa effects should be declared. In the Khanda where malefics prepondrate, the effect will be sorrowful. If the lord of the 8th house be in his exaltation Rasi or Navamsa and be conjoined with a malefic, then the period is trebled.

Slokas 49-51.—When the Lagna or its Amsa belongs to Jupiter, the departed person goes to heaven. If the Lagna or its Amsa belong to Venus or the Moon, the native goes to the world of the Manes. If the Lagna or its Amsa be owned by the Sun or Mars, the native goes to the world of Mortals. If Ketu occupy or own the Lagna Rasi or its Amsa, the departed will be in Hell. If the Lagna or its Amsa belong to Mercury, he will become an animal of the brutal kind. If the Lagna or its Amsa belong to Saturn or Rahu, the native will be reborn in the world of Devils or Manes.

Sloka 54.—Whatever effects have been declared—both auspicious and inauspicious—for the human beings from birth to death in ancient astrological works, all these have been stated here as above.

Thus ends the 26th Adhyaya entitled Nairyanika—Exit from the world—in Horasara, a work composed by Sri Prithuyasas, son of Sri : Varahamihira.

सप्तविंशोऽध्यायः

सुवर्णफलपुष्पादीन् दत्वा तं हितमादरात् ।

Slokas 1-3—In the case of a person whose year, Ayana, Ritu, month, etc., fortnight, day, the Navamsa, Dwadasamsa, Lagna, Nakshatra, and the Rasi occupied by the Moon at the time of birth are not known, all these may be ascertained by the querist from the astrologer. At a time when the sky is clear and cloudless, the querist should approach the astrologer with kind enquiries, worship him by offering Dakshina, fruits, flowers, etc. and then consult him about his own business.

आरूढोदयलग्नादीनाकृतिं पृच्छकस्य च ।

वर्षायनर्तुमासर्क्षराशींस्तैः परिकल्पयेत् ।
बहुप्रकारैः संचिन्त्य सर्वं प्रब्रुयाद्वेद्बुधः ॥ ५ ॥

Slokas 4-5.—The astrologer should, after an inspection of the querist, his form and his surroundings, find out the आरूढ (Arudha) Lagna and also the Lagna rising and the indications at the time, and from all these, deduce the year, Ayana, Ritu, month, Nakshatra and the Rasi of birth of the querist, and fix them up after trying various methods and then reveal them to the querist.

तात्कालिकांशसंयुक्ते जीवे जातो न संशयः ।
तत् त्रिकोणगते वाऽपि द्वयोरारूढयोर्बलात् ॥ ६ ॥

Sloka 6.—The Navamsa Rasi occupied by Jupiter or its triangular Rasi will invariably be the Janma Rasi of the querist. As for the Lagna, find the stronger of the two, *viz.* the Arudha and the Lagna at the time.

कर्तुर्वयोनुमानेन तेषामेवं प्रकल्पयेत् ।
प्रश्नकाले विलग्नस्य पूर्वार्द्धेऽप्युत्तरायणम् ॥ ७ ॥
परार्द्धे दक्षिणं ब्रूयाज्जन्म सम्पृच्छते बुधः ।

Slokas 7, 7½.—The things mentioned in the previous sloka should be determined as explained below by an inference of the querist's age : if the Lagna at the time of query belongs to the first half of a Rasi, the birth must have happened in the Uttarayana ; if the second half, in the Dakshinayana. Thus should the astrologer declare to the person making the query.

ऋतुर्वाच्यो दृगाणेशो लग्नसंस्थोऽथवा ग्रहः ॥ ८ ॥
शनिशुक्रकुजा ईशा ऋतूनामुत्तरायणे ।

दक्षिणे शशिविज्ञीवा नाथाः प्रोक्ताः क्रमादृषैः ॥ ९ ॥

Slokas 8-9.—And the Ritu of birth should be guessed through the planet occupying or owning the Lagna decanate. In the Uttarayana, the lords of the three Ritus are Saturn, Venus and Mars, while in the Dakshinayana, the corresponding lords are the Moon, Mercury and Jupiter.

अर्कोदये तु होरायां द्रेक्काणे भास्करस्य वा ।
ग्रीष्मे जातं विजानीयान्नान्यग्रहदृशा युते ॥ १० ॥

Sloka 10.—If the Lagna, Hora or Drekkana rising at the time of query belong to the Sun, and be not (conjoined with or) aspected by any other planet, it should be understood that the querist should have been born in the Greeshma Ritu.

अयनस्य तु वैलोम्ये परिवर्तः परस्परम् ।
शशिज्ञगुरुभिः सार्द्धं सितलोहितसूर्यजाः ॥ ११ ॥

Sloka 11.—When the Ritu does not fit in with the Ayana, it has to be exchanged thus : the Moon, Mercury and Jupiter should be substituted for Venus, Mars and Saturn respectively.

द्रेक्काणार्द्धे भवेत्पूर्वे मासः पूर्वोऽपरे परः ।
पूर्वोत्तरमुखो भूत्वा दक्षिणाङ्गं यदि स्पृशेत् ॥ १२ ॥
उत्तरायणमासे तु जन्तुर्जातो न संशयः ।

पुनः स्पर्शे पुनर्मासो वक्तव्यो दैवावित्तमैः ।
तयोर्निरूपणादैक्यं यत्तथ्यं तत्र संशयः ॥ १५ ॥

Sloka 12-15.—If the Lagna rising at the time be in the first half of a decanate, the month of birth will be the first of the two months constituting the Ritu ; if it be the second, it will be the second of the two months. Facing the North-East, if you touch a limb in the right side, the birth must have been in a month of the Uttarayana. If you touch any in the other side, the birth was in a month of the Dakshinayana. The Ritu may also be guessed correctly by touching a flower.

If the querist should touch first a lower limb of the body, the birth was in the Purva Ayana ; if an upper limb, the birth was in the Dakshinayana. By a similar touch again, the month of birth may be guessed by the astrologer. When the two inferences coincide, the correctness of the inference is assured.

यदि वृश्चिककुंभौ च कन्यामीनतुलाधराः ।

Sloka 16.—If Vrischika, Kumbha, Kanya, Meena, Tula or Simha be the Lagna, the birth should undoubtedly have been in the night.

वृषभे कर्किभे चैव मिथुने मृगधन्विनोः ।
दिवा विनिर्दिशेज्जातमर्कहोरोदयेऽपि च ॥ १७ ॥

Sloka 17.—When one of the signs Vrishabha, Karkataka, Mithuna, Makara and Dhanus is rising or if the rising Hora belong to the Sun, the birth should have happened in day-time.

मीनोदये नवांशे वा सन्ध्याकाले विनिर्दिशेत् ।
अथवा दिनसन्धौ वा मध्याह्ने वार्द्धरात्रिके ॥ १८ ॥

Sloka 18.—When Meena Rasi or Meena Navamsa is rising, the birth should have been at a Sandhya-Sunset

or Sunrise, or, during *juncture* in the day, midday or midnight.

यावन्तोऽभ्युदिता भागा राशौ प्रश्नविधौ ततः ।
तावत्यो घटिका वाच्या दिवा रात्रौ च जन्मनि ॥ १९ ॥

Sloka 19.—The degrees that have risen in the Lagna or the Moon at query indicate the Ghatikas after Sunrise or Sunset at birth.

ऊर्ध्वकाये चरं विद्यान्मध्यमे स्थिरराशिकम् ।
अधमे तूभयो ज्ञेय एवं देहविभागतः ॥ २० ॥

Sloka 20—The upper portion of the body represents a moveable Rasi, while the middle portion, an immoveable one. The lower portion denotes a mutable Rasi.

शीर्षादि संस्पृशेत्प्रष्टा प्रश्ने तद्राशिमादिशेत् ।
भक्ष्याहृताकाररुतैश्चिन्तयेत्तद्विशेषकम् ॥ २१ ॥

Sloka 21.—If at query the querist should touch the head or any limb of his body, the birth should be declared to have happened when that Rasi indicated by the limb was rising. The details of it may also be determined by the articles of food if any that may be brought, any forms that may appear on the scene or any cry that may be heard at the time.

ग्रहेष्वाधिकवीर्यो यः स यत्रास्ते गृहे ततः ।
प्रश्नलग्नं भवेद्यावात्तावल्लग्नमितीरयेत् ॥ २२ ॥

Sloka 22.—Find the strongest of the planets at the time of query and also note the Rasi occupied by the same, and how far the Lagna at query is removed from that Rasi. The Lagna at birth will be so far removed from that Rasi.

आरूढराशिं जन्मर्क्षं तत्त्रिकोणमथापि वा ।
ग्रहयोगेक्षणे वाऽपि तत्क्षेत्रं जन्मभं विदुः ॥ २३ ॥

Sloka 23.—Or, the Rasi at birth will be the same as the आरूढराशि or its triangular Rasi. Or, it will be the Rasi which is conjoined with or aspected by the relative planets.

आरूढोदयपर्यन्तं यावन्तो राशयस्तदा ।
तावन्त्यश्वयादिभानि स्युर्जन्मर्क्षं पृच्छकस्य तु ॥ २४ ॥

Sloka 24.—Find the number of Rasis between the Arudha and the rising signs ; and count so many asterisms reckoning from Aswini. This will be the Janma Nakshatra of the querist.

ADHYAYA—XXXI

अथ नक्षत्रजातकम् ॥

भानोस्तंशशिनो नटःसनिधरापुत्रस्य राहोर्दया
तापोदेवगुरोर्धयाननशनेः सायं विदो वत्सराः ।

केतोः सानिभृगोर्नभाश्च कथितास्त्वाग्नेयनक्षत्रका-
द्धानामर्यमदैवताश्च खचरा विश्वर्क्षतः स्वामिनः ॥ १ ॥

Sloka 1.—The Dasa-period reckoned in years of the Sun, the Moon, Mars, Rahu, Jupiter, Saturn, Mercury, Ketu and Venus are in their order 6, 10, 7, 18, 16, 19, 17, 7 and 20, and these planets preside over the nine triads of stars, counted from Krittika, thus :

Krittika,	Uttara Phalguni,	Uttarashadha	— Sun
Rohini,	Hasta,	Sravana	— Moon.
Mrigasiras,	Chitra	Dhanishta	— Mars.
Ardra	Swati	Satabhishak	— Rahu.
Punarvasu	Visakha	Purvabhadra	— Jupiter.
Pushya	Anuradha	Uttarabhadra	— Saturn.
Aslesha	Jyeshta	Revati	— Mercury.
Magha	Moola	Aswini	— Ketu.
Purva-Phalguni	Purvashadha	Bharani	— Venus.

स्वजन्मनक्षत्रविलग्नतो वा ब्रूयात्क्रमेणैव दशाफलानि ।
दशावसानेष्वशुभं च सर्वे कुर्वन्ति सामान्यमिदं नराणाम् ॥२॥

Sloka 2.—The effects of the several Dasas should be predicted to happen in regular order reckoned from one's natal star or from the Ascendant. All planets prove malefic at the concluding periods of their Dasas ; this is generally the case for all persons.

आदित्यभौमशनिराहुदशावसाने
रोगार्थनाशकलहास्त्वशुभानि सन्ति ।
पापग्रहेण सहितस्य दशावसाने
मृत्युं वदेन्निधनसंस्थितखेचरस्य ॥ ३ ॥

Sloka 3.—At the close of the Dasa-periods of the Sun, Mars, Saturn and Rahu, diseases will crop up, wealth will be destroyed, quarrels and such untoward events will generally happen. In the case of a planet conjoined with a malefic or situated in the 8th house, the death of the person concerned may be expected.

पापग्रहान्वितर्क्षस्य दशायां क्लेशमाप्नुयात् ।
यावद्गते दशेशर्क्षे तत्फलं तत्र निर्दिशेत् ॥ ४ ॥

Sloka 4.—When a malefic planet is in an asterism whose Dasa is ruling at the time, the person concerned will be afflicted with sorrow and the same will occur at the time signified by the distance travelled in the Rasi occupied by the aforesaid malefic

त्रिमण्डलेष्वथैकास्मिन् पापस्तिष्ठति दुर्बलः ।
सौम्यग्रहयुतो न स्याद्दशान्ते मृत्युमाप्नुयात् ॥ ५ ॥

Sloka 5.—When in one of the three cyclic divisions (into which the 12 houses may be arranged under certain conditions for आयुर्दाय—Ayurdaya purposes), there is a malefic planet devoid of strength and unassociated with a benefic planet, the person affected by this Yoga will meet with his demise at the conclusion of the Dasa of the weak malefic planet in question.

राशिसन्धौ स्थिते काले व्याधिं तत्र विनिर्दिशेत् ।
त्रिंशद्भागमनुक्रान्ते दशान्ते मृत्युमाप्नुयात् ॥ ६ ॥

Sloka 6 —The Dasa period of a planet occupying the end of a sign brings on desease ; death may happen in the Dasa ot the planet in question when the planet has progressed no further than the 30th degree of the राशि—Rasi.

जन्मतश्चोर्ध्वनाडीभिर्वर्धयेत्तन्महादशाम् ।
षष्ट्याहृतं फलं वर्षं शेषं मासादिकल्पयेत् ॥ ७ ॥

Sloka 7.– Find the portion still to elapse of the asterism of birth and multiply the same by the Dasa years allotted for it. Divide the product by 60. The quotient will reveal the Dasa years. Out of the remainder, the months, days, etc. may be similarly calculated.

तस्मात्क्रमेण संयोज्य दशाप्रोक्तफलं वदेत् ।
वर्तमानदशास्थाप्या चेष्टग्रहदशाहता ॥ ८ ॥
प्रमाणभक्ता यल्लब्धं दशास्वन्तर्दशा भवेत् ।
अन्तर्दशाफलं प्रोक्तं पूर्वमेवात्र निर्दिशेत् ॥ ९ ॥

Slokas 8-9 – It is only after a careful scrutiny in this way that one should predict the effects described above. To calculate the Antara-period of a particular planet in any Dasa, the following is the procedure : Multiply the years of the Maha Dasa by the years of the planet whose Antar Dasa is required. Divide the product by 120. The quotient will represent the years of the Antardasa. Whatever has been stated before as the effects of the Antardasa should be tacked on here.

अङ्गारकफलं केतो राहोरप्यर्कजस्य वै ।
शेषं समानामित्युक्तं शुभाशुभफलं वदेत् ॥ १० ॥

Sloka 10 —The effects derivable from Ketu will be like those from Mars ; those from Rahu will be similar to Saturn's. In the case of the rest, the good and evil effects will be equal.

नक्षत्रजातकं प्रोक्तं सर्वेषां संमतं नृणाम् ।
अतिसूक्ष्मतरं ज्ञात्वा दशाफलमुदीरयेत् ॥ ११ ॥

Sloka 11.—Whatever has been declared as derivable from the several asteresisms is invariably acceptable to all. After a close scrutiny of the several details, the effects of the Dasas should be predicted.

अन्तर्दशाधिपक्षेत्रे वर्तते भास्करो यदा ।
तस्मिन् काले दशाप्रोक्तफलं भवति निश्चितम् ॥ १२ ॥

Sloka 12—If during the Antardasa of any planet the Sun transits the sign owned by that planet, the effects of the Antardasa will, without doubt, be fully felt by the person concerned.

लग्नेन्द्वोर्बलवान्यो वा तस्मात्प्रभृति चिन्तयेत् ।

इति श्रीवराहमिहिरसुत श्रीपृथुयशोविरचिते होरासारे
नक्षत्रजातकफलाध्याय एकत्रिंशः ॥

Sloka 13.—Of the Lagna and the Moon, find which is stronger : the effects of the several Bhavas described above should be predicted by a clever astrologer reckoning from the significator which possesses greater strength.

Thus ends the 31st Adhyaya entitled " Effects arising from the Nakshatra Jataka ' in Horasara, a work composed by Prithuyasas, the son of Varahamihira.

कृकलासोरगगोधाकपालनग्नादिदर्शनं नेष्टम् ।
तेषां कथाप्रलापैरनर्थमायान्तमीरयेन्नूनम् ॥ ४ ॥

Slokas 1-4.—On a clean spot in a lonely place, the astrologer should seat himself comfortably facing the Sun ; and after saluting his preceptor, God Ganapati and all the planets and observing silence and having a lofly ideal closely watch all the omens as directed by sage Siddhasena. Any hit by a weapon, quarrel, fall from a precipice, crying etc., are declared as bad omens at the commencement of prediction (by the astrologer) and they indicate death, separation or destruction of property. Should a snake, or a camelion, an alligator, a leper, (a skull ?) or a naked mendicant etc., appear on the scene, it is untoward : even a reference or a talk about them is indicative of evil and certainly forebodes danger or disaster.

वामे रुतं तु गौल्याः क्षुतं च वामेतरस्थले न शुभे ।
जम्बुकमहिषपशूनां स्वरश्च तद्वत् समीपतो मृत्युः ॥५॥

Sloka 5.—A cry of the lizard in the left, and a sneezing on the right side are inauspicious So also are the sounds (howling) of a jackal, buffalo or a cow very near as they portend death.

वाक्प्रश्नपरिज्ञानं शुभाशुभं तत्र चिन्तयेन्मतिमान् ।
वर्षद्वयादधस्तात् पूर्वोक्तफलं समादिशेत्तज्ज्ञः ॥ ६ ॥

Sloka 6.—The person will be able to correctly answer enquiries into one's future, and intelligently predict good or evil by observing good or evil omens occurring at the time, within a limit of two years.

कर्तुर्वयःप्रमाणं मासं नक्षत्रलग्नहोराद्यम् ।
गतकालिदिवसान् ज्ञात्वा ग्रहचारं प्रारभेत पुण्यतिथौ ॥ ७॥

Sloka 7.—After knowing the probable age, month, the asterism, Lagna, Hora, etc., and the number of days that have elapsed in the Kaliyuga, the astrologer should begin on an auspicious Tithi the calculation of the position of the several planets at the time.

मृदुशीघ्रवक्रकाले मूढोदययुद्धकालभेदेषु ।
पैतामहवरगणितात्क्रियो भूयोऽवधानतो गणयेत् ॥ ८ ॥

Sloka 8.—When the planet's motion is slow, swift, retrograde, when he is eclipsed, is rising, when he is at war, etc., the astrologer should carefully calculate the planetary positions verifying them at every step with Brahmagupta's treatise of calculations.

अतिसूक्ष्मतरं ज्ञात्वा गतिं ग्रहणामनेन चारज्ञः ।
द्रेक्काणनवमभागद्वादशखगुणांशकादींश्च ॥ ९ ॥

Sloka 9.—After ascertaining the minute details of the movements of the planets as stated above, the astrologer should draw the charts of the Drekkana (Decanate), Navamsa, Dwadasamsa and Trimsamsa, etc.

प्राक्फलदावर्ककुजौ बुधगुरुमन्दास्तु पृष्ठफलदाः स्युः ।
उदयफलं शीतांशोः शुक्रस्य फलं गतिसमानम् ॥ १० ॥

Sloka 10.—The Sun and Mars bestow their effects at the commencement; Mercury, Jupiter and Saturn, at

the end ; the Moon, at the time of her rising. The ripening of Sukra's effects will depend on the nature of his motion.

वक्रानुवक्रकाले भृगुचारो ज्ञातुमेव न च शक्यः ।
तस्माद्बहुप्रकारैर्गणितविशेषैश्च चिन्तयेत्तज्ज्ञः ॥ ११ ॥

Sloka 11.—It is not possible to correctly ascertain the exact position of Venus when he changes his movements from Retrograde to Direct motion. Therefore a clever astrologer should calculate and verify through different methods the correct location of that planet.

इष्टं स्फुटं द्विचरं नवभिर्गुणयेद्विशेषयेत क्रमशः ।
मण्डलहृतावशिष्टं तस्यैवांशस्फुटं समानं तत् ॥ १२ ॥

Sloka 12.—In the case of any planet, find the exact position in signs, degrees, etc. Multiply the same by 9 and divide the product by 12. The remainder will represent the correct स्फुट of the planet's Amsa.

इष्टः स्फुटश्च खचरो द्वादशगुणितः स्फुटेन संयुक्तः ।
मण्डलहृतावाशिष्टो ज्ञेयो राश्यंशकस्फुटः सुधिया ॥ १३ ॥

Sloka 13.—Take the case of any planet; multiply the figures denoting his position by 12 and add to the product the planet's own figures. Divide the sum by 30. The remainder will represent the स्फुट of the Amsa.

एकादशांशभानुस्फुटयोगफलं निशाकरे योज्यम् ।
चतुरंशं शेषाणामेवं कुर्याद्धनक्षयं तुल्यम् ॥ १४ ॥

Sloka 14.—Add $\frac{1}{11}$th of the figures denoting the Sun's position to the figures for the Moon. Take a fourth of the figures for the remaining planets; this should be added to or subtracted as the case may be from the figures of the planets.

शुक्रज्ञयोर्द्विगुणितं भानुस्फुटवद्धनक्षयं कुर्यात् ।
मूढोदयवक्रेषु च कुर्यादेवं तयोस्तु नान्यत्र ॥ १५ ॥

Sloka 15.—In the case of Venus and Mercury, the figures have to be doubled ; addition or subtraction should be resorted to as in the case of the figures for the Sun ; when the two planets are eclipsed or reappearing (after eclipse) or are retrograde in their motion, then alone, this has to be done and nowhere else.

रक्तकुसुमाक्षतगन्धैः संपूज्य दिवाकरं नमस्कृत्य ।
प्रष्टा स्वशक्तिविभवैर्दैवज्ञं पूजयेद्ग्रहान् ध्यात्वा ॥ १६ ॥

Sloka 16.—After performing Puja (worship) to the Sun-God with red flowers, camphor, rice and sandal and saluting him and worshipping the planets, the querist may honour the astrologer according to his means.

आयुःप्रमाणमस्मिन् गतागतं वर्तमानमशुभशुभम् ।
एतत्सर्वं श्रोतुं भवत्प्रसादात् प्रयोगमिच्छामि ॥ १७ ॥

Sloka 17.—"I wish to know the probable length of life, the good and bad in the past, present and the future ; all these results, I want to hear through your favour".

प्रारभ्य सन्मुहूर्ते सुचन्द्रताराबलान्विते प्रष्टुः ।
जातमखिलं च विलिखेन्नान्यमनाः स्वायुरादिकं प्रष्टुः ॥ १८ ॥

Sloka 18.—Commencing at an auspicious Muhurta, when the Moon is benefic and endowed with the strength of the Nakshatra occupied by her, the astrologer should give an account in writing of all that has happened, that is now happening, and is going to happen, as regards the querist, and his longevity, etc., with the equanimity of mind.

फलदं ज्योतिश्चक्रं ग्रहर्क्षचारस्तथैव गुणकारः ।
दैवज्ञः कालनरश्चैवं संभावयेन्नरश्रेष्ठः ॥ १९ ॥

Sloka 19.—The Zodiac is fully effective; the planets and their transit through the several signs of the Zodiac is similarly productive of (good) effects. The astrologer and the Kala purusha—all these, the person concerned should duly honour with suitable presents.

पृथुविरचितमन्यैः शास्त्रमेतत्समस्तं

कृतमिह हि समर्थं धीविषाणामलत्वे
मम यदि न सदुक्तं सज्जनैः क्षम्यतां तत् ॥२०॥

Sloka 20.—The whole of this has been composed by me, in a succinct manner after a perusal of the meaning of the exhaustive works by others on the subject. I have only abridged them for sharpening the intellect of my readers. If anything has been done or described incorrectly through my ignorance, I crave the indulgence of the benevolent public to excuse the same.

इति श्रीवराहमिहिरसुतश्रीपृथुयशोविरचिते होरासारे
जातकलक्षणाध्यायोऽद्वात्रिंशः ॥

Sloka 21.—Having churned well the ocean of Astrology with the intellect as the Churning Stick (Mandara mountain), the Moon in the form of this scientific treatise has been well taken out for lighting (enlightening) the entire world.

Thus ends the 32nd Adhyaya entitled "Jataka Lakshana" in Horasara, a work composed by Sri Prithuyasas, the son of Sri Varahamihira.
